Petunia **Romantica** series *O.G.M. free*

Male sterility is a unique feature of the new Farao Petunias which gives distinct advantages over other Petunias. These include: -

- Flowering earlier with continuous flowering to Autumn, long after other Petunias are exhausted.
- Temperature tolerance from 5C to 40C Male Sterile Petunias will continue to grow. Improved frost resistance.
- Phenomenal branching on short internodes ensuring a profusion of beautiful flowers throughout the season.
- Weather tolerant flowers after light rain and amazing recovery after heavy rain.
- All male sterile Petunias are adaptable and ideally suited for plugs, pots, hanging baskets and landscape. e with age and temperature. A beautiful addition to the garden.

Romantica Isabella F1

A small multiflora star patterned Petunia with all the benefits of male sterility. Isabella is a very floriferous selection radiating soft burgundy with yellow tones which subtly change with age and temperature. A beautiful addition to the garden.

Romantica Moonlight F1

A multiflora star patterned Petunia with all the benefits of male sterility.

Moonlight has a very attractive colour combination of rich burgundy which is enhanced by a light rose star. A romantic addition to the garden.

Romantica Juliette F1

A small multiflora Petunia with all the benefits of male sterility.

Juliette has a very interestingly flower which transforms, with age and temperature, from a deep red to bright red. Each flower is further enhanced with a white star or border. An intriguing addition to the garden.

Romantica Star F1

A small multiflora Petunia with all the benefits of male sterility.

Star provides a strong, uniform contrast between the red flower and cream star. Very floriferous. A true star in any garden.

Romantica Sophie F1

A grandiflora Petunia with all the benefits of male sterility.

Sophie has alluring rich red flowers, dark throat with a light white border. A sophisticated flower for any garden.

Romantica Norma F1

A multiflora Petunia with all the benefits of male sterility.

Norma has a unique contrast of plum and cream colouration. A very interesting variety in all situations.

Petunia x hybrida

Growing Information

Novelty Characteristics: petunia male sterile, resistant to cold and hot temperature. Small flower for this very floriferous type.

Flower: Single, 5 cm diameter

Use: Bedding Plant

Plant: Bush-shaped plant form, height: 20-25 cm, spread: 50-60 cm

Petunia F1 Multiflora

Flower size: ca. 8 cm.
 Pot size: 10-12 cm.
 Habit: Upright
 Crop time after potting: 7-9-weeks

Major improvement over existing multiflora petunias in the garden. Candy has greater weather and disease tolerance. It recovers very quickly after rain and overhead watering. The flowers have a consistent picotee pattern that is maintained on compact well branched plants. Candy is a great choice for packs, pots and baskets. It has been bred and tested in some of the hottest places in the world for heat tolerance and garden performance.

Gioconda *O.G.M. free*

Petunia Multiflora F1

Petunia Gioconda is completely new type of petunia. After many years of breeding, we produced the most versatile Petunia. This variety is ideally suited for all existing types of production and uses in the garden. However with the remarkable ability to adapt to a wide range of temperatures from as low as minus 5C to 40C and continue to grow at low temperatures. Flowering continuously from early spring to late autumn. As a plug and pack plant the uniqueness of Gioconda can be seen. Ideally adapted to all garden uses - pot, container, hanging basket or open ground, branching habit which produces an amazing number of flowers. More tolerance to Botrytis then seen in existing Petunia's.

Pot size: 9-12 cm
Habit: Upright
Crop time after potting: 7-9-weeks

Pansy F1 **Sweet Pea Mixed**

The first pansy 100% double flower that can be used for cut flower, growing up right. Mixed of salmon, rose, violet, white.

Acquarelle Pansy F1

The ultimate in romantic pansies. Large flowered and in a wide range of beautiful subtle watercolour shades, Acquarelle is suited to autumn.

GELATO SALMON RED

STRAWBERRY ORCHID

Desiderio Pansy F1

A collection of large flowered pansies for markets requiring something different. Featuring unique eye catching bicolours and tricolours, Pot size: 9-10,5 cm Habit: Upright Crop time after potting: 5-7-weeks

Ballerina Pansy F1

The refined cousin of Can Can. Gorgeously frilled and ruffled flowers float above a well branched multifloral habit in a delightful array of colours. Very free flowering with medium sized flowers,-

Pot size: 12-14 cm

Moulin Rouge

A beautiful large flowered pansy with frilled and ruffled petals. With extra long flower stems, this variety makes a delightful cut flower particularly in cooler temperatures, for autumn and spring sales.

Aurora Shades

Pansy F1

Yellow shades with blue picotee flowers. Aurora is a delicately painted color on a sturdy plant. The contrast between the blue picotee and yellow adds to the beauty of this variety, for autumn and spring sales.

Chianti Shades

A touch of the old fashioned is sometimes needed! It reminds us of the good old days. These semi ruffled medium sized pansies carry rich shades of terracotta, salmon, rose and red wine making this variety unique in its kind. The plants are ideal for both pots and bedding, for autumn and spring sales.

Flamenco

Pansy F1

Pot size: 10-12 cm
Habit: Upright
Crop time after potting: 8-10-weeks

A newly designed mixture of large exquisitely double and semi double flowered pansies with a compact well-branched habit. Early flowering and with surprising weather tolerance, Flamenco is best suited to containers where its beauty can be most appreciated, for autumn and spring sales.
