VISUAL MERCHANDISING GUIDELINES

DISPLAY PEARLS, PAVE AND GOLD

- Combine pearl jewellery with jewels in other materials
- Gold and mother of pearl combine well
- Layering necklaces on the display gives a clear picture of how different necklaces can be worn together.

- Create depth by presenting earrings from large to small
- When presenting statement items, make sure to balance them with top 30 items

- Place the busts in the shape of a pyramid: small busts outside □right and left □and place the large busts in the center of the display
- For more slack in height: place a block under the large bust.

VISUAL MERCHANDISING GUIDELINES

DISPLAY: COLORS AND SHAPES

- If a jewel contains a pavé element, for example, we suggest to support this with other jewels with pavé elements. However, make sure to maintain a balance between gold and pavé items
- This display shows different jewels with angular shapes. By using similar shapes, the display looks calm and balanced.

- By combining different rings on a holder, consumers can get inspired about stacking rings.

- Try combining color with gold and silver jewellery, don't place all jewels in a similar color on one display
- Keep the display balanced by combining colored jewellery with basic jewellery.

VISUAL MERCHANDISING GUIDELINES

DISPLAY: DISPLAY GOLD AND PEARLS

- Combine chunky necklaces with more delicate necklaces

PRODUCT INFORMATION

JEWELLERY

Over the years, TI SENTO has raised the bar for silver jewellery. We offer the highest quality jewellery at an acceptable price: our designs are complete in both appearance and wear-ability. Every detail is there to beautify and exceed customer’s expectations. This applies to every item and every element in our collection, from our attention to the small details, to the hand setting of the stones and of course, the selection of the materials we work with.

Material - Sterling silver (925)

All TI SENTO jewellery is made with Sterling silver (925). This means 92.5% is pure silver and 7.5% alloys. The higher the percentage of silver, the softer the product will be. In order to prevent damage and breakage, ear jewellery and locks are given an extra addition of a little steel. All pieces designed with linking parts are soldered on all connecting elements. Bracelet locks are especially designed to remain more solid over time.

TREATMENTS

Platinum plated

To give the silver an extra shine, all jewellery is platinum plated. The platinum plating also provides an extra protection against scratching and natural discoloration. For some jewellery pieces TI SENTO uses black coloured rhodium or ruthenium to enhance the design.

Gold plating

Several items in the collection are yellow or rose gold plated. The - 18 carat - gold layer is 3 microns thick. As TI SENTO is a silver jewellery brand, gold plating is used as a design element, so the plating is applied on the silver. To complement the colours of stones or the overall design, details such as settings and prongs can be gold plated as well.

As the plating is a thin layer, just like rhodium, it might fade or disappear in time. Usage of certain medicines by the wearer or bringing the jewellery into contact with water and soap may accelerate this process.

SETTINGS

Bezel / closed setting

The stone is set in a completely closed set case. This is a setting method which embraces a stone and holds it securely in place. It is one of the oldest techniques and remains an excellent method to protect both the girdle (middle) and the pavilion (bottom) of a stone from chips and scratches.

Claw / prong setting

The stone is set by small claws. Rounded in the shape of a bead, the claws are bent over and shaped, holding the stone in place. This is the most common method that can, for instance be, found in solitaire engagement rings.

Pavé setting

A method of setting stones next to each other so that an entire surface is covered by small stones. This creates a uniform and glittering piece. The pavé setting is handset by diamond setters.

Gallery / fretwork

This is the decoration on the back of the set case. The more open the gallery design is, the more light will fall on the stones. Transparent stones, such as Zirconia in a brilliant cut, need a closed set case with a small opening in the middle to let the light through.

STONES

Cubic Zirconia (CZ)

The stones that are often set in TI SENTO jewellery are Cubic Zirconia. This is a synthetic stone made out of natural material. Zirconia is relatively hard. It measures 8 on the Mohs scale (diamonds measure a 10) and has a triple A quality and clearness. Cubic Zirconia is available in many colours and can be cut in extremely sharp facets.

Pearls with a crystal core

TI SENTO uses pearls with a crystal core in its designs. The pearls combine the quality of a perfect crystal core with the beauty of a pearl coating, giving the pearls a flawless, silky smooth surface. The weight of these pearls is similar to natural or cultured pearls and the sensory perception allows these pearls to adapt to the skin’s warmth like real pearls. The crystal pearls are also less likely to scratch and change colour.

Synthetic crystal

Synthetic crystal is made of material with the same features as crystal. It is softer than Cubic Zirconium and measures 6-7 on the Mohs scale. Because of the variety in colours available and its hardness, many TI SENTO designs are made using this stone.

Mother-of-pearl doublet

This stone is made up of two layers: the base consists of a pearl layer topped with a second layer of synthetic crystal.

Veined stone

This type of stone has an organic structure in a given colour that gives it a veined marble type of look. Each cut stone is therefore unique in its pattern.
