09 — Aesthetics & technology united

Find out how our refined high-tech woven flooring fits your everyday needs in performance and acoustics, while presenting a great look and feel.

Sustainably produced — 25

Learn how we care for our planet by investing in more sustainable and durable products, eco-conscious production processes and a circular future.

37 — Sector solutions

Our vast library of products allows you to design any kind of environment: from a productive workspace, to a hospitable hotel lobby.

Timeless collections — 71

Discover our collections: a wide range of designs and patterns, available in an abundance of colours.

137 — 2TEC2 Rugs

Beautiful textures to create inviting spaces.

Installation & technical info — 143

Learn all about the high-tech performance of our refined woven flooring and practical benefits when installing.

148 — Samples & tools

Don't hesitate: order your samples, contact us or visualise your upcoming project with our digital simulator.

What drives us to create

"We create
more than
just floors,
we provide
solutions"

— Katia Dewitte
Managing Director 2TEC2

"2TEC2 is a brand that continuously strives for **innovation** in terms of technology and **sustainability**. The 'TEC' in our name refers to our ambition to make a difference in the flooring world with a high-tech product for architects, for people and for the planet.

We invest heavily in the development of new materials, improved product design and a fully circular process. Sustainable entrepreneurship is our duty as a company in the years to come. We strongly believe that **design** can go hand in hand with **respect for the environment**. Aesthetics are at the heart of 2TEC2, it's our DNA. Our flooring is completely designed and produced in Belgium, guaranteeing total control and premium quality. Our personal and family-oriented nature, our passion for textures and our appreciation for craftsmanship form the basis of our business philosophy."

Refined aesthetics

UNIQUE DESIGNS

Natural elements are the inspiration for our designs. Nature is always in balance, its appealing aesthetics never fade. This is what we strive for: to achieve natural beauty and balance indoors.

- We keep up with the newest trends in interior design.
- We provide timeless flooring that never goes out of style.
- We create our own colours and thus provide a wide range of original shades.

ENDLESS DESIGN CREATIVITY

Our flooring is standard available in tiles, planks or rolls. You can also discover the fun and unique shapes of our Play concept on p.120. For important projects, you can create your own design and colour.

Our standard sizes:

ZONING

Flooring is the perfect way to visually and functionally define different zones in bigger spaces. By using different colours from our wide range of shades, you can easily create several areas serving different purposes.

Collection & product Hybrid Helios & Infinite Neptune tiles
Installation pattern Ashlar

Our in-house design team creates unique designs and colour combinations

Marble & Desert collection

STRUCTURE & TEXTURE

The woven top layer has a textured look and feel. Its 3D jacquard weave is very attractive.

SEAMLESS

Nearly all our designs are seamless in an ashlar or brick installation pattern. This means you are not able to see the seams between the tiles. This creates a broadloom effect.

COLOUR CHANGE

With our flooring, you can create a unique design effect. It offers a change of colour, depending on the installation and point of view.

DIRT CONCEALING

Our designs can visually conceal dirt or stains, because we play with design, colour, and texture. Your floor can be thoroughly cleaned with every cleaning round.

High tech, high performance

Our floors offer the best choice for hospitality, workspace, retail, and healthcare.

Collection & product Infinite Moonless Night tiles Installation pattern Ashlar

BEST OF BOTH WORLDS

We offer the durability and cleanability of hard flooring combined with the acoustic properties and comfort of soft flooring.

CLASS 33 HEAVY COMMERCIAL USE*

2TEC2 floors are ideal for the project market: they are suited for high traffic levels, castor chair tested, and shockproof. Thanks to their long life span, we are confident to offer a warranty of 15 years.
(*) According to EN1307.

STRENGTH IN LAYERS

Our high-tech tiles and rolls are ingeniously composed of 5 performant layers:

- ① Woven layer
- ② Precoat layer
- ③ Fibreglass non-woven layer
- ④ Base coat layer
- ⑤ Acoustic felt layer SonoFelt™

COLOUR FASTNESS

Our floors retain their colours, even when exposed to heavy foot traffic and light. This is because our vinyl yarns are coloured to the core.

LIGHT REFLECTION VALUE (LRV)

LRV is a score that indicates how much a surface reflects light. Thanks to our wide range of values, you can brighten up a room or prevent overexposure. A document with all values is available for you at your request.

DIMENSIONAL STABILITY

Our strong build-up of layers and our tight weave with yarns with a fibreglass core guarantee a high dimensional stability. This results in minimal shrinkage or expansion when exposed to changes in temperature or humidity.

UNDERFOOT WALKING COMFORT

The underlayer of floorings has an important impact on walking comfort and how knees, feet, and back are affected by steps. 2TEC2's felt underlayer provides extra comfort.

QUALITY CONTROL

All our products are quality and performance tested in external certified labs to get the necessary certificates. We also invested heavily in our own laboratory in order to perform daily in-house testing and to deliver the best quality.

EASY INSTALLATION

2TEC2 floors allow a hassle-free installation, they require little preparation and tools.

NON-PERMANENT INSTALLATION

Our tiles are installed with a tackifier adhesive. This makes them stay in place, yet easy to remove and replace when necessary or even reuse in another space.

RAISED FLOORING SYSTEM

2TEC2 is the perfect choice for raised flooring systems, keeping easy access to technical installations beneath the floor.

FLOOR HEATING

Our floors are suitable for underfloor heating or cooling, allowing installations to perform as they should.

Collection & product Desert Farafra tiles Installation pattern Monolithic

Excellent acoustics

Our acoustic comfort backing SonoFelt™ provides maximum acoustic wellbeing.

WHAT HAPPENS WHEN SOUND WAVES COLLIDE WITH A SURFACE

When a sound collides with a surface, it can go three ways:

- ① it can be **echoed** back
- ② it can be **absorbed** by the surface
- ③ it can **go through** the surface

Your choice of flooring has an impact on what happens and thus defines your level of **acoustic comfort**.

① WALKING NOISE REDUCTION

This concerns sound waves which are echoed back in the room.

'Walking noise reduction' is the difference in noise level when walking on 2TEC2 flooring compared to walking on laminate.

2TEC2's SonoFelt™ backing reduces walking noise by 70%.

① Reflected noise
70% walking noise reduction

② Absorbed noise
0,15 α_w sound absorption

③ Reduced noise
19 dB impact sound reduction

② ACOUSTICAL SOUND ABSORPTION

This applies to the absorbed noise in a room.

'Acoustical sound absorption' is the level of absorption of sound waves in a room. When a sound wave hits a surface, a portion of that wave is reflected, a part is absorbed. The better the absorption of a sound wave, the less reverberation.

2TEC2 absorbs 15% (0,15 α_w) of the sound waves that hit the floor.

③ IMPACT SOUND REDUCTION

This metric refers to the level by which sound waves are transmitted through the floor into the room beneath.

'Impact sound reduction' is the difference in noise levels as measured in the room beneath the floor when walking on 2TEC2 flooring compared to walking on a concrete floor.

→ 2TEC2's 19 dB SonoFelt™ acoustic backing reduces the sound coming from the room above by 19 dB.

ACOUSTIC SOUND TRANSMISSION

Cleanability

A highly maintenance-friendly floor solution

DUST RESISTANT MESH

Our top layer traps dust and dirt, allowing for effective cleaning with a vacuum cleaner and water.

WATERPROOF

Our floors are not affected by moist conditions. They offer ease of use for spas and gyms or healthcare environments.

EASY MAINTENANCE

Our floors can be easily cleaned with just water, there is no need for hazardous chemical cleaning products. They are also stain-resistant. Since they do not absorb any liquids, stains are easy to remove.

For optimal maintenance, we refer to our general cleaning instructions.

When 2TEC2 is placed at an entrance, a walk-off mat is recommended. Entrance matting prevents soiling and accelerated wear.

GENERAL CLEANING INSTRUCTIONS

- Vacuum your floor regularly to avoid dirt buildup and to decrease attraction of dust.
- Remove dirt, stains and liquids by simply using water and a sponge without any additives within 24 hours.
- Diluted detergent or bleach may be used for persistent stains.
- Perform a deep cleaning at least once a year to elongate the life of your floor and keep it as beautiful as it was intended.
- Use a water injection/extraction device. Steam cleaning appliances are not recommended.

Health & hygiene

ANTI-ALLERGENIC PROPERTIES

The structure of our flooring keeps dust particles from floating around, so they cannot affect your health. Most of all, unlike a regular carpet, they can be easily vacuumed and removed. We don't use materials that can cause an allergic reaction.

Collection & product Infinite Coffee Bean tiles
Installation pattern Ashlar

ANTI-FUNGAL PROPERTIES

Our floors obtained the best score in specialised tests. This certifies that 2TEC2 floors do not allow fungi to grow, which makes them an ideal solution for moist environments.

Collection & product Infinite Moonless Night tiles
Installation pattern Ashlar

SUITABLE FOR DISINFECTION

Our floors are resistant to disinfectants, a necessity in healthcare environments. The yarn's colour intensity is not affected, even after years of maintenance.

NO HARMFUL VOLATILE ORGANIC COMPOUND EMISSIONS (VOC'S)

2TEC2 flooring ensures a safe and healthy environment without indoor air pollution. Our floors are Indoor Air Comfort Gold and FloorScore certified, meaning they release no harmful VOCs.

We avoid the use of harmful raw materials in the production of our floors.

Collection & product Infinite Moonrock tiles Installation pattern Ashlar

Safety compliance

REACTION TO FIRE

All our floors are fire-retardant. 2TEC2 features a **Bfl-s1 classification**, the most strict fire class for textile floor covering.

ANTI-STATIC PROPERTIES

Walking on plastic or carpeted floors creates friction that can make you electrically charged. Thanks to our anti-static additives, we prevent this from happening.

Collection & product Infinite Moonrock Installation pattern Ashlar Client WZC Kapittelhof (BE)

ANTI-SLIP PROPERTIES

Our floors have **anti-slip properties**, which minimises the risk of falling. This makes us an excellent option for healthcare environments and public spaces.

NO DANGEROUS SUBSTANCES

Our flooring contains **no dangerous substances** like **phthalates** and heavy metals. We are REACH compliant and M1 certified.

Sustainably produced

2TEC2 is devoted to designing and producing **recyclable woven flooring**. We aim for the highest sustainability performance, while preserving and protecting the world beneath our feet.

- Care for our planet & environment — **26**
- Care for people & health — **27**
- Bio-based materials — **28**
- Circularity & recyclability — **29**
- Our new recycling facility — **30**
- Our journey towards a circular future — **32**
- Compliance & certifications — **34**

Care for our planet & environment

STRATEGIES FOR RESPONSIBLE PRODUCTION

- Decrease our CO₂ emissions
- Reduce our use of (non-renewable) fossil raw materials

THE 3 C'S

Our sustainability pillars and our vision are centred around care, circularity and compliance.

INTEGRATED PRODUCTION

We avoid harmful CO₂ emissions of multiple transports to and from suppliers of raw or semifinished materials by integrating all of our production operations and activities on one site.

SOLAR POWER

We avoid 820 tons of greenhouse gas emissions per year, thanks to 3.154 photovoltaic panels on our buildings that capture a massive quantity of solar power to reintroduce in our production.

OPTIMISED CLOSED CIRCUIT ENERGY RE-USE

We have a heat recovery system that re-uses already present energy and a closed water cooling system to minimise water use.

ENERGY STORAGE

We increase our use of renewable energy even more through a battery energy storage system (BESS) at our own premises. This enormous battery stores the excess solar power produced by our photovoltaic panels.

Care for people & health

NO PHTHALATES NOR HEAVY METALS

2TEC2 complies with the most strict norms in its field, to make sure our customers are not exposed to hazardous chemicals. Our floor tiles, planks and rolls do not contain any phthalates or heavy metals.

HYGIENE AND CLEANABILITY

Thanks to our unique woven structure that captures dirt particles until the next cleaning round, 2TEC2 flooring solutions actively contribute to a cleaner air in the room. With the ease of cleaning 2TEC2, your personal surroundings will remain spotless and healthy at all times.

EXCELLENT ACOUSTIC PERFORMANCE

Acoustics play an important role in well-being and comfort in a room.

MENTAL WELL-BEING

A beautiful environment makes people happy. Our floorings contribute to healthy buildings by creating pleasant, creative and comfortable spaces.

SUSTAINABLE DEVELOPMENT GOALS

2TEC2 is committed to contribute to the following United Nations Sustainable Development goals:

Bio-based materials

BIO-BASED MATERIALS IN OUR FLOORS

As part of our pioneering journey we created a bio-based vinyl compound which is used in the top layer of our woven flooring. We replaced materials on the basis of fossil carbon in the compound formula of the PVC pellets that are used to make our vinyl yarns of the toplayer, with materials on the basis of biological origin.

Thanks to this innovation, the woven top layer of collections with this feature consists of **45% more renewable bio-based content**, meaning this reduces the consumption of virgin fossil materials by 45%.

Bio - Based

What are bio-based materials?

Bio-based products are derived from materials of biological origin such as plants, excluding materials coming from geological formations and fossilised materials.

Virgin fossil raw materials are a finite resource, whereas bio-based ones are renewable. The use of bio-based products leads to a reduction of CO₂ emissions, less toxic waste, and a decrease in energy and water consumption during production processes. In short, choosing bio-based materials is a step in the right direction towards a more sustainable future.

Interwoven
with nature

Circularity & recyclability

RECYCLED CONTENT

We save the equivalent of 15.000 PET bottles for every 1000 m² flooring. Our current felt underlayer is composed of 70% PET recycled contents. In a continuous process of innovation, we aim to increase this share even more.

RECYCLABILITY

All of 2TEC2 tiles, rolls and planks are 100% recyclable. All materials introduced in our circular production cycle are meticulously quality-checked for composition and performance. 2TEC2 is designed and produced to be fully recycled and to regenerate new 2TEC2 flooring again and again – without losing strength.

WASTE MANAGEMENT

We sort and organise our waste and used materials in all operations to ensure a maximum of recycling possibilities with these resources. Yarn waste, end-of-bobbin yarns, weave excess, cut waste, samples, second-quality tiles and all other leftover materials are carefully collected so they can be sent to our new recycling facility. Leftover yarns are also being re-used to create beautiful outdoor rugs for our sister company Limited Edition.

2TEC2 waste material forms the basis for new 2TEC2 production resources.

Our new recycling facility

A FULLY CIRCULAR ECOSYSTEM

Built a few kilometers from our production site, a brand new recycling facility will convert pre-consumer production waste into new raw material that will serve as a basis to compose new, strong and attractive 2TEC2 tiles.

These 2TEC2 tiles will include more than 50% recycled content in total. There will be no change to the visual aspect, stability, performance and durability in this regenerated flooring.

2TEC2 In-house recycling plant

2tec2
high tech flooring
Towards a fully circular future

Shredded waste

”

As pioneers in this field, we see an exciting challenge in contributing to the preservation of the planet’s finite resources.

Interwoven with a circular future

CIRCULARITY

2TEC2 is designed and produced to regenerate new 2TEC2 flooring again and again.

RECYCLING

All manufacturing waste and 2TEC2 flooring at end of life is being recycled in our own recycling plant.

RE-USE

All 2TEC2 recycled material is being entirely re-used in our production facility. 2TEC2 flooring is manufactured with more than 50% recycled content.

Our journey towards a circular future

2005
LONG-LASTING DURABILITY

From the start, the product was designed to be durable and long-lasting.

2013
**REDUCING AND RE-USING
PRE-CONSUMER WASTE**

Leftover yarns are smartly used in the production of outdoor rugs of our sister company and other products.

2017
INTRODUCING RECYCLED CONTENT

The Acoustic Comfort Backing now contains recycled PET content.

2019
REDUCING OUR CARBON FOOTPRINT

2TEC2 invests in **solar installations** and a **heat recovery system**. We install a fully integrated production cycle to ensure a durable, long-lasting quality, and to drastically improve our ecological footprint and energy consumption.

2023
DESIGN FOR CIRCULARITY

- Investments towards a greener future:
- R&D and operations adjustments
 - New product design
 - Building our new in-house recycling plant

2023
**REVOLUTIONARY INNOVATION:
ADDING BIO-BASED CONTENT TO OUR
FLOORS**

Pioneering in our type of product, we have launched our floorings with bio-based content in the top layer's woven structure. A major step in our journey to reducing fossil-based materials.

2023
INCREASING OUR RECYCLED CONTENT

We introduce SonoFelt™, our new felt underlaying backing, composed of minimum 70% recycled PET and reducing noise by 19dB or more.

2024
A FULLY CIRCULAR FUTURE

We will fully re-use and recycle our floors, production waste and leftover materials into new 2TEC2 tiles or rolls.

**HOW DO WE PLAN TO REACH OUR GOAL
OF BEING FULLY RECYCLABLE WITH 0%
VIRGIN FOSSIL RAW MATERIAL?**

- ✓ Using bio-based materials
- ✓ Using more recycled contents
- ✓ Producing a fully recyclable product
- ✓ Operating our own recycling facility

Compliance & certifications

PROOF OF EXCELLENCE

2TEC2 understands the importance of providing credible and transparent evidence of our commitments and actions. Our international certification experts are tasked with documenting test results, accurate product performance and composition information. We comply with a series of respectful international certificates and labels, to show the world how much we care about product quality, human health and the environment.

CONTRIBUTING TO HEALTHY AND SAFE BUILDINGS

In order to help you achieve the building certifications schemes LEED and BREEAM, 2TEC2 can contribute credits (up to 16 for BREEAM and 20 for LEED). These credits reflect contributions to impact categories including health and well-being, energy, responsible choice of materials, acoustics, the product's life cycle, environmental impact and waste management. This provides reassurance to our customers that buildings using our flooring solutions are as healthy and non-harmful as possible.

The WELL Building Standard is a vehicle for buildings and organisations to deliver more thoughtful and intentional spaces that enhance human health and comfort. In the categories air, light, sound and materials, 2TEC2 can substantially contribute to the score of your building: we can help you with 2 Preconditions and 10 Optimisations.

OUR CERTIFICATES

We comply with a wide range of health, durability and ecological audits, certifications and labels.

Alhambra

Inspired by the refined expression of beauty and emotion found within the well-known Moorish sun-soaked Alhambra palace, this pattern plays hide and seek with intricate mosaics and vegetal motifs.

The Arabic name 'al-Hamra' means 'the red fortress', celebrating nature's dance of light and sun on warm evenings. The colour palette varies from the azure hues of the Andalusian sky to the earthy warmth of sienna and umber tones in the surrounding hills. Celebrating the art of discovery, the Alhambra motif beckons with its delicate filigree of ornamental motifs and ever-unfolding details, inviting you on a journey of exploration and delight. Each glance reveals new intricacies, weaving together echoes of history and whispers of elegance.

Elevate your space with the Alhambra Collection and let the spirit of Moorish grandeur and exquisite craftsmanship adorn your interiors with grace and refinement.

Bio-Based

Palma

Embrace the serene oasis of palm tree leaves beneath your feet and let their gentle sway evoke a feeling of relaxation and sophistication.

The Palma Collection captures the essence of tropical elegance, bringing a sense of natural allure to any space. The Latin word “palma” holds a rich history and symbolism, originally referring to the palm of the hand as the key to life. Palm branches stood for victory and honour in ancient Rome. Over time, the palm tree became associated with peace, prosperity, and tropical paradise. Its graceful leaves and resilient nature have inspired artists and designers throughout the ages, carrying an exotic whisper of eternal life.

Palma exudes warm elegance, beauty, and tranquility, yet is at the same time vibrant and visually engaging. Create a lively space with this refined masterpiece design, crafted by nature.

Bio-based components

2TEC2 is proud to present you its first **bio-based collection**. We are replacing the compound formulation on the basis of fossil carbon for the pellets of which our 2TEC2 yarns are made, with a plant-based formula. A such we are replacing the finite fossil carbon in our yarns with these innovative plant-based raw materials. Thanks to this step, the woven top layer contains **renewable materials**, making your flooring more sustainable.

Silva

Silva is the Latin name for ‘wood’ or ‘forest’, and this perfectly epitomises this floor covering. With a single step you are transported to beautiful woodlands, where the branches sway to the rhythm of the breeze and create a unique play of shadows.

Collection & product Silva Maple planks Installation pattern Herringbone

A collection of various stone and material samples, including large textured grey panels, smaller rectangular pieces of brown and grey stone, and a small square piece of dark brown stone, arranged on a light background.

Marble

Eminent, regal, and everlasting. These words come to mind when viewing our Marble collection. This collection is inspired by the crystalline material that has been used to build impressive palace halls and acted as the canvas for breathtaking monuments throughout the ages. Each design features the wild, yet purposeful streaks of colour that are unique to its namesake, echoing the controlled chaos that can only come from nature's own design.

Desert

The Desert collection pays homage to the awe-inspiring stretches of arid wasteland that blanket our planet. Though the pattern may appear simple, just like the terrain its named for, each piece is made of a unique and vibrant ecosystem, which creates an impressive, everlasting impression.

Infinite
collection

Infinite

Our Infinite collection is inspired by the mysteries beyond our planet. Looking upwards, we sought to bring the beauty and awe of the night sky, and the celestial bodies that inhabit it, down beneath your feet. Named after the cosmic figures of our universe, each of the pieces in this collection expresses limitless power.

collection

Collection & product Hybrid Rosetta tiles Installation pattern Ashlar

Hybrid

The Hybrid collection is inspired by the biophilic design philosophy. Biophilia is the inborn need people possess for contact with nature which is essential to their physical and mental health, productivity and well-being. Satisfying this need for contact with nature in the modern built environment is something called biophilic design.

Colourful
collection

Colourful

Our Colourful collection is a complex combination of hues and tints to breathe life into your flooring. Each of our shades is inspired by powerful forces of nature, vivid expressions of strength, from the bright tail of an asteroid streaking across a midnight sky to the magnificent undulations of the Aurora Borealis, to the flickering ferocity of fire. With a darker base undertone, each pattern is flecked with lighter shades, creating a complex visual.

Herringbone
& Cracked earth
collection

Herringbone

Herringbone is influenced by the sharp, V-shaped patterns found in the delicate fossils of the marine animals after which this pattern is named. Just like the biological structure it is inspired by, the Herringbone pattern acts as the unyielding, skeletal framework for your room, upon which you can build the rest of your interior design. While using the same colour, the alternating columns in this design give the curious appearance of two distinct shades when viewed from afar.

Cracked Earth

Cracked Earth tells a story of the earth's resilience to the elements as it weathers the onslaught of passing millennia. Inspired by the arid landscapes on our planet subject to the unforgiving power of volcanic activity, this collection reminds occupants of the unique grandeur that comes with age. The cracked lines featured in this collection are striking and powerful, exhibiting the raw strength of time, and the earth's obstinance against it.

Barcode,
Stripes & Lustre
collection

Collection & product Barcode Diamond rolls

Barcode

The Barcode collection uses shading and geometric techniques to create an illusion of movement along its surface. Harmonizing both dark and light, this pattern evokes serenity, reflecting the first rays of a rising sun. Looking closely, one can see the barcodes are constructed through asymmetrical, linear weaves which, when stepping back, gives off an illustrious perspective.

Diamond

Quartz

Tiles	Rolls
50 x 50 cm	200 cm wide

Stripes

Stripes utilises streaks of spirited colour to inject your space with life and excitement. Bright blue or orange lines against a dark base, the streaks of dye are an eye-catching accent piece to match the colour tones that define your room. A combination of thick and thin lines offers a textured appearance to the floor.

Beautiful textures to create inviting spaces

BEAUTIFUL RUGS TO CREATE ATMOSPHERE

Our woven rugs make for unique centrepieces that can accentuate a neutral space or extend the floor style of another room, without compromising on cleanability and performance. Durable, strong and uniquely beautiful, our woven rugs are the solution to create **extra atmosphere** or **functional zoning** in hospitality, reception areas, office spaces, meeting rooms, showrooms or outdoors.

DIFFERENT SHAPES, MATCHING FINISH

Our rugs come in various shapes and sizes, finished with a border that matches the design and colour of the rug.

Would you rather have something truly unique? Bespoke options are available, ask our sales team to work out a custom-made floor solution with our rugs.

Installation of a 2TEC2 floor

ADHESIVES

Rolls are to be placed with a permanent adhesive, while tiles are to be placed with a non-permanent one.

USE AND RE-USE

Tiles installed with tackifier are easy to remove and replace if you wish to update your interior or to re-use them in another location.

THE FINISHING TOUCH

We recommend to install your 2TEC2 floors as the final step in your construction or renovation project to protect our beautiful patterns from dust, paint or indents.

READY-TO-USE

You can immediately walk on 2TEC2 and furnish your room after the installation, no need to wait.

A VERSATILE FLOORING SOLUTION

2TEC2 can be installed on different types of evenly levelled subfloors: cement-based floors, stone floors, even LVT or hardboard floors can be assessed fit for 2TEC2 installation. Just make sure the underfloor is clean, dry and completely even levelled, and you will get a perfect result.

A professional installer will ensure that the beautiful texture of 2TEC2 comes to life in your room. Feel free to reach out to our network of installers or make sure to consult our installation instructions. 2TEC2 is always at your disposal to provide additional technical support.
