Today, *Cap* is considered as one of the leading companies in the field of disposable products for Ho.Re.Ca and Consumer needs. *Cap* has successfully operated in this field for years thanks to the flexibility and quality of the range of products offered. Innovation and professionalism: these have always been the key words expressed since the beginning of the company by its founder, and also by the later generations of the Bonini family. With the same humility and devotion, this became the inspiring principle of each action taken in the maintenance and development of their business.

L'esistenza nel tempo di un'azienda è subordinata alla simultanea e costante realizzazione di una importantissima condizione: la soddisfazione del Cliente. Per poter soddisfare al meglio il Cliente, bisogna fornirgli un prodotto qualitativamente perfetto, pertanto abbiamo provveduto a certificarsi da anni e ci atteniamo rigorosamente alla normativa UNI EN ISO 9001:2015, al fine di poter migliorare continuamente i nostri processi aziendali e di conseguenza il nostro prodotto finito.

The long-term existence of a company is subordinate to the current and constant realization of an important condition: the satisfaction of the Customer. In order to best satisfy the Customer, it is necessary to provide them with a qualitatively perfect product, therefore we have been certified for years and we rigorously adhere to the UNI EN ISO 9001: 2015 standard, in order to improve our corporate processes and consequently our end products.

L'attenzione alla qualità Ambientale, legata anche alla prossimità con il Parco Nazionale delle Foreste Casentinesi, ha favorito la realizzazione di un importante impianto fotovoltaico, che permette all'azienda di ridurre ulteriormente il proprio impatto sul territorio, con la produzione di energia pulita in grado di soddisfare buona parte del proprio fabbisogno energetico.

Attention to Environmental Quality, linked also to the proximity with the Casentinesi National Forests, has favored the realization of an important photovoltaic system, which allows the company to further reduce its impact on the territory, with the production of clean energy able to meet a good part of its own energy needs.
