

CRIMPING PRESS GAMMA T-12

Gamma press T-12 is a machine designed for crimping wire sizes up to 2.5 sqmm.

The machine accepts applicators of all major manufacturers and can be equipped with crimp force analyzer for crimping quality control.

Gamma T-12 press is equipped with a six digit counter, safety cover and reel holder for end or side-feed applicators. Stability, sturdiness and reliability are the main features of this machine.
