OUR LINES

The **Fancy** line was born from the encounter between our experience setting up campers and the needs of sports enthusiasts, Plein air and all those workers who travel, with or without equipment.

Our goal is quite simple: create a van that can accompany you on your travels, taking everything you need.

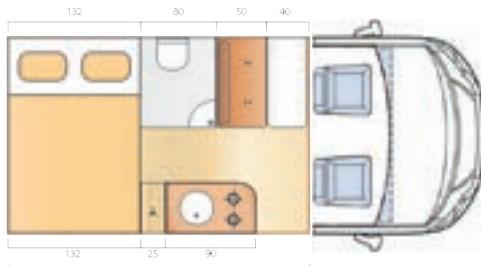

Thus an **essential line** comes to life, where practicality and comfort are combined with the robustness of a **carefully crafted** piece of furniture.

The **Ready** line was born to satisfy the need to have an agile vehicle with which to move every day, being able to sleep and cook if necessary.

Therefore, we have created a **compact minivan**, a practical alternative to the car, furnished with a **large double bed** and a seat that converts into a bed for one adult or two children with the ISOFIX system.

Fancy Series - Fiat Ducato

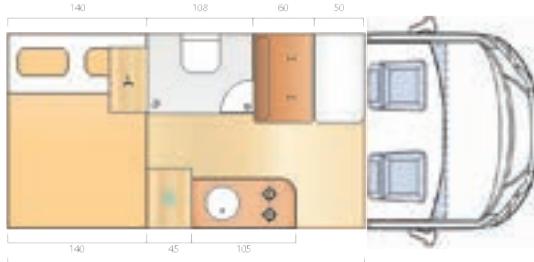

Fancy 540 m 5.41

Unladen weight Kg 2695 - Wheelbase mm 3450

Permitied persons 4 - 3 in bed (1900x1300+1800x800)*

external width mm 2050

the data sheets dedicated to each model.

INSULATION SYSTEM

Our vans boast an insulation system with high-coefficient insulation panels and polyurethane foam injected by spray into the interstices and coating with covers for cancelling thermal bridges.

With this type of insulation Aiesistem guarantees maximum comfort at any temperature, even extreme, and allows maximum travel comfort thanks to the total absence of vibrations.
