100 hectares of land, of which 15 farmed as an organic vineyard, over 1100 olive and fruit trees, are some of the essential features of the organic, wine-growing farm, known as Nugareto. An “environmental restoration” process to valorise an authentic area in the Colli Bolognesi and make it accessible. Wine-growing is favoured by suitable soil and that balance between growing traditional vines and the main local vine Grechetto Gentile known as wine Pignoletto. The organic wines produced by Nugareto want aim mean to create a historical link with Bologna.
