

LE CYCLO-FA' SHOW

**Madame Silhouette and Monsieur Penombre
present a funny old-style comedy:**

**the protagonist of the show is Le Cyclo-fa', their traveling living room, part bicycle
and part sofa,
which becomes the stage of their quarrels and love effusions.**

**A handmade kamishibai opens the story, followed by a series of eccentric music acts,
rudimentary pre-cinema contraptions, paper cutting, balancing acts and Fellini-like
settings for a unique show.**

**The *Belle Epoque* costumes are exclusively self-produced, as are images, pictures
and the scenery.**

SILHOUETTE PORTRAITS

Madame Silhouette rediscovers the ancient art of silhouette portrait:

an art form from France, which appeared towards the middle of the XVIII century.

The technique entailed cutting a piece of black paper in the shape of a person's profile, directly with scissors and in just a few minutes.

This art was lost for years, and today very few artists are able to reproduce a perfect similarity with just a few cuts.
