ZETACALCI

The idea of ZetaCalci™ began to take shape in 2013 from the creativity of the Tuscan artisan Ennio Zingoni, a hunting and long-range shooting enthusiast. In the beginning of 2015 this idea became ZetaCalci, i.e. one of the first Made-in- Italy brands for rifle gunstocks (and maybe in the near future not only for rifles!).

Furthermore, ZetaCalci offers a line of high-quality aftermarket accessories, made in solid aluminium-ergal 7075, all of them made in Italy too.

ZetaCalci proposes single-block stocks in an innovative material, with technical features and devices specifically created for long-range shooting gunstocks.

The union of this material with experience and passion has succeeded in creating very high quality products, all of them hand-crafted and custom-made, with an extremely precise research for the perfect fitting for each model.

Composite material with polyurethane resin as matrix, reinforced with short fibres. Besides the guarantee represented by the Made-in- Italy trademark, ZetaCalci ensures quality control on each single gunstock produced in the factory.

Since 2021, with the collaboration with his son Lorenzo, starts to produce CARBONFIBER GUNSTOCKS. Made completely in carbonfiber shell and special carbonifber mixture as filling material, with already the barrel place in the carbonifiber shell.

Shells are made with carbonfiber layers in hand lay-up to give the right mechanical strenght to the right parts.

Our filling material is a special mixture of carbon fibers and resin, that filler is really good machinable material (not as lot f others carbonifiber stocks) and it gives to the stock best mechanical strenght.

Barrel place is ready in the shell and not made with mechanical milling, in this way carbonfiber is not discontinue and it gives to the stock really great strenght.

SUPER MAGNUM

CARBONFIBER

WEIGHT: 1'400 g (no inlet) - 1300g inlet Remington s.a.

This is the most tactical stock of the new 3 models in carbonfiber, thank to its weight is good for hunting or competition. IN the realization of this model, we have taken account to have great place to set also high-caliber.

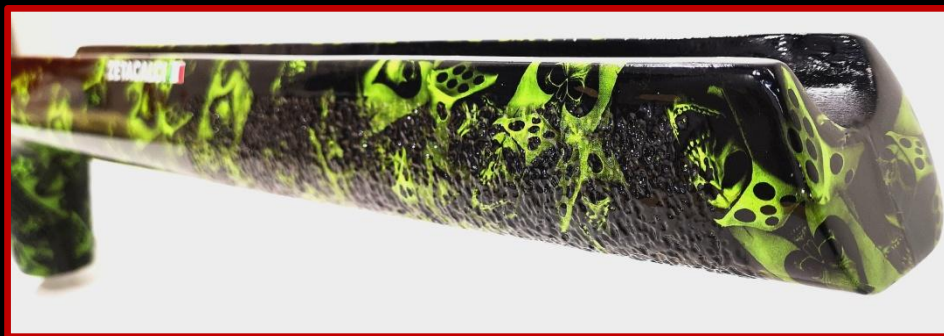

This stock can be ordered with buttplate and cheekpiece adjustables or not.

**WEIGHT 1'750 g (no inlet)**

This stock can be ordered with buttplate and cheekpiece adjustables or not.
