

WHO WE ARE

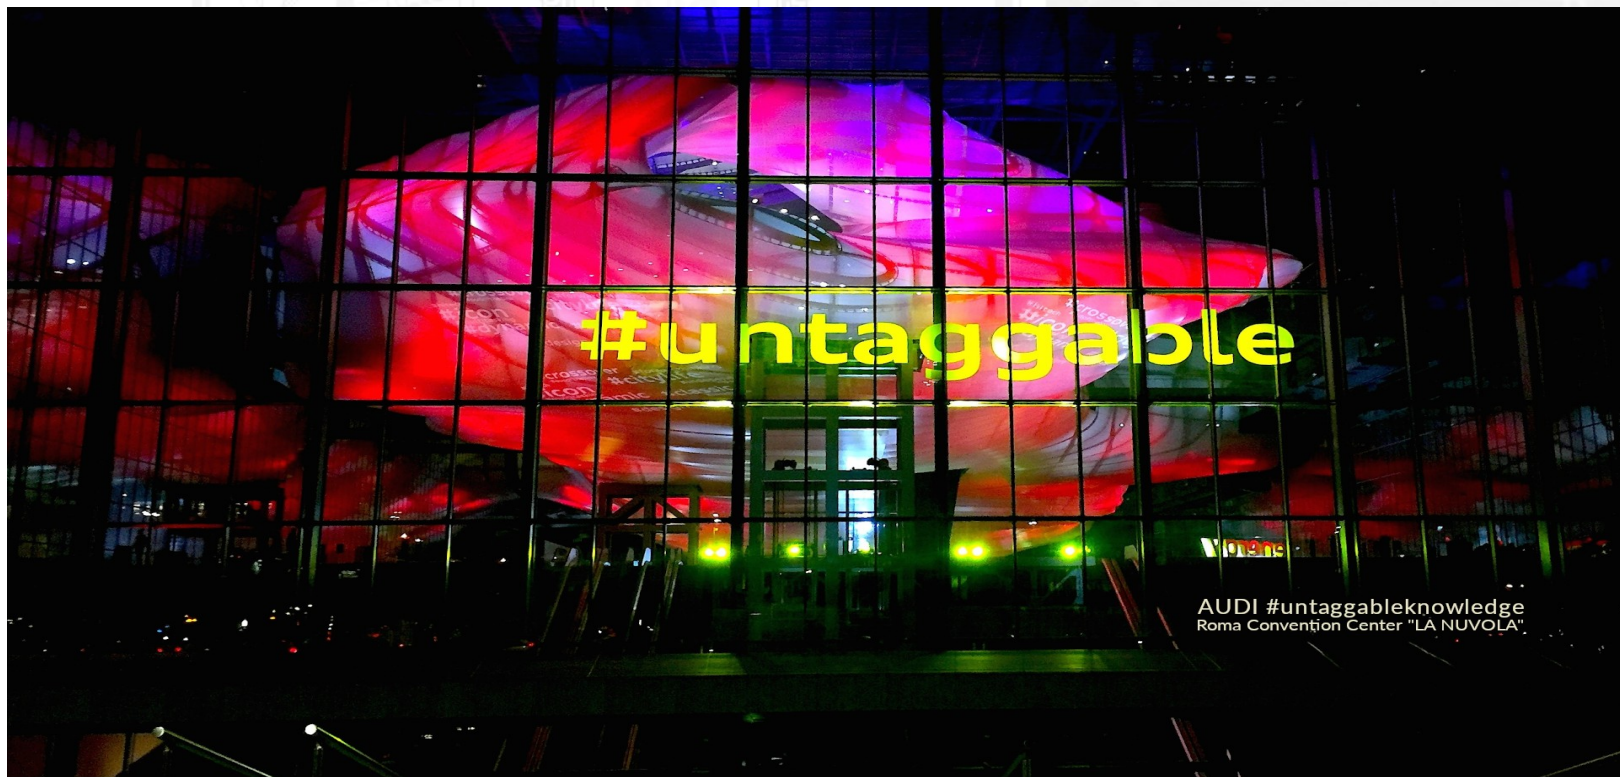

In 2013 a group of professionals with a long international experience in the event entertainment sector founded BOTW s.r.l., a production and event organization company.

BOTW
BRIDGE OVERTROUBLED WATER

It quickly became a full-service structure able to realize any type of event and create innovative solutions taking advantage of a large team of entertainment professionals, true artisans and concept creators such as designers, engineers, architects, production managers, specialised technicians in the video audio, and lighting sectors, machinists, stage painters, tailors, electricians, plumbers, set designers and researchers.

BOTW presents itself as the single executor of corporate, musical, institutional and sports events, exhibitions, road shows and major events, intervening with standards of the highest quality on any part of the event.

In this sense BOTW is a unique company in this sector, with its 4500 sq m of covered space (and the same in open space) that house technical, production and administrative offices and warehouses, this allows the company total autonomy.

BOTW accompanies the customer through all phases of their project, from its genesis, working out the general project's concept, analyzing the creative, technical and logistic needs then the rough study with relative cost analysis.

Carrying it from the planning to its realization, backed up by the safety and site organization plans.

Services

BOTW offers services, equipment and skills for the entertainment industry
covering all the customer's needs

A **'Full Service'**, with lighting, audio, video and scaffolding warehouses, stage-design and production workshops, a seamstress department and a furniture warehouse.

The internal resources, represented by a large number of staff, range from the administrative and secretariat sector to planning and executive production, from highly specialized technicians to logistics personnel, all of them guarantee excellence and the prompt realization of all projects.

Stages and Scaffolding

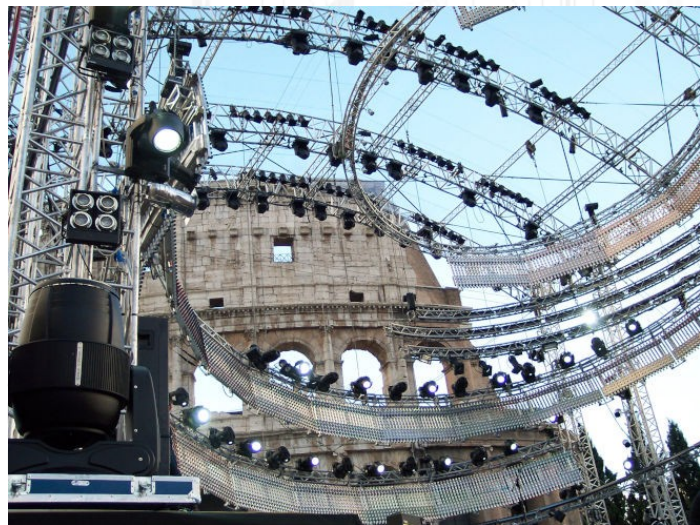

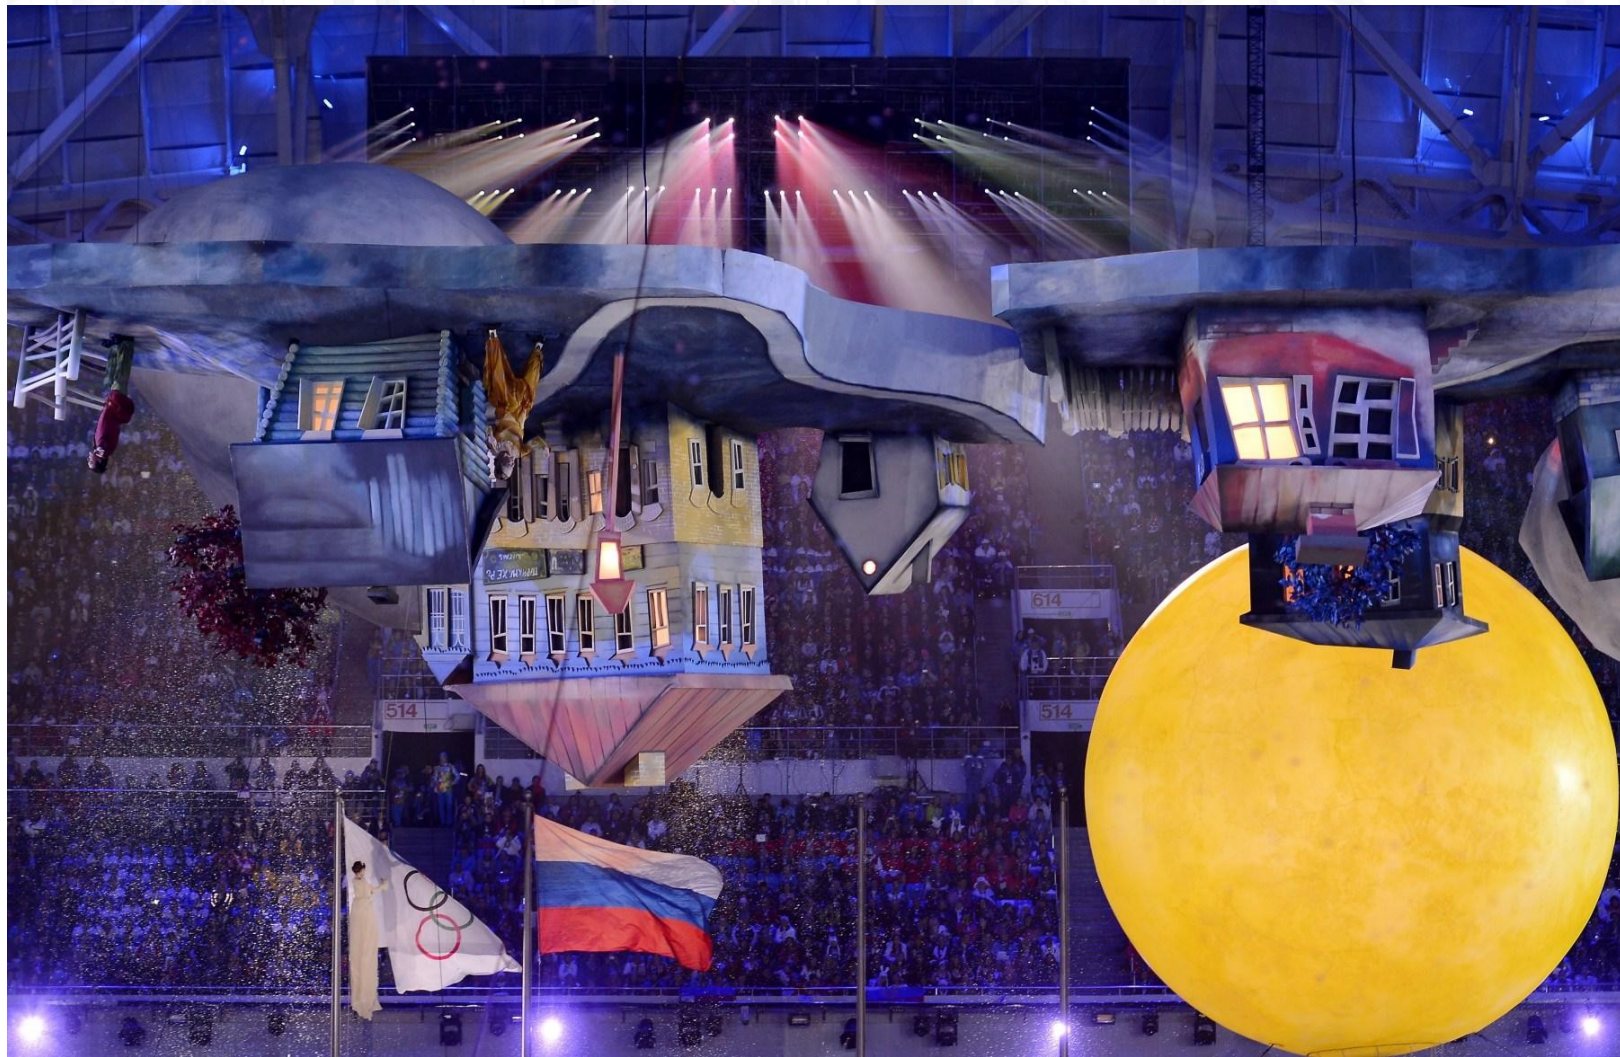

BOTW provides tailor-made stages and scaffolding, offering different solutions depending on the event, location and customer needs.

We design, certify and set up small and large scaffolding, roofs and stages for every type of event, using modular systems and/or components specifically made by our metal workshop.

Modular stages - Automation and control systems - Fixed or motorized roofs - Layer systems.

Certified scaffolding.

Rigging and suspension systems

In every type of event the study and execution of suspension systems (rigging) represent a fundamental aspect for the project's success.

We design and certify complex suspension solutions for any existing or pre-existing roof using the best technological solutions available. Absolute safety and functionality, rationalization and cost containment in the erecting and dismantling phases, are just some of the parameters that we always keep in mind when approaching the project.

BOTW offers a complete range of products and services for rigging:
Aluminium pylons, towers, roofs, lifting and control systems:
Cyberhoist, CM Lodestar, Chain Master - **Construction of SPECIAL TRUSSES.**

Stage design and Production

The presence of all production areas at our headquarters is an important aspect for the event's planning right from the first phase when together with the client we study their needs.

Being able to personally follow the construction phases, choosing the materials, the stage design fixtures, adding details and seeing them made in the pre-assembly areas, are aspects that represent a plus for the client's creativity.

Designers, set designers, carpenters, blacksmiths and fitters: a full team for the entire creative process of the event.

Carpentry, upholstery and painting give the customer the opportunity to deal with a sole contact, allowing them complete freedom in choosing how to approach the project and its realization.

Lights

BOTW has high profile professional light designers and lighting technicians and provides the latest generation technology.

BOTW designs, supplies and manages lighting systems for large and small events, for public and private spaces, it creates permanent installations for public and private spaces. It also works on finding new systems and on sustainable energy.

Motorized projectors: Martin, Coemar, Clay Paky, Sgm, Robe

Control systems:

MA Lighting, High End System, Chamsys

Conventional lights:

Arri, De Sisti, Thomas, Spotlight, E.T.C., ROBERT JULIAT

Lighting systems for exhibition spaces.

Audio

BOTW. designs and produces systems for conferences, concerts and major events.

After a careful acoustic survey of the venue, systems are designed choosing diffusers suited to the technical and aesthetic characteristics of the event.

The company has acquired technologies and a sensitivity that has enabled it to provide the right acoustics for speakers at a convention as well as for the music at a concert it has also installed permanent acoustic corrections to many Italia venues.

Sound Engineers and specialized audio technicians guarantee the event's success, from corporate ones to major Italian music festivals.

Diffusion systems:

Meyer Sound, d&b audiotechnik, K-Array

Mixer: YAMAHA, DiGiCo

Microphones: SENNHEISER, SHURE, AKG

Recording and post production systems.

Video, broadcasting, 3D videomapping

Aware of the video sector's importance in event entertainment, BOTW accompanies the customer in planning the event, offering the most varied solutions, from architectural and stage video projections to video mapping; from HD graphics direction to Full HD and SD camera direction, from live streaming to post-production.

The company has the best technologies and broadcast equipment, from laser video projectors to indoor and outdoor LED screens, from touch screen systems to media servers, such as watch out and D3.

A team of specialized technicians is able to enrich the event project with the most innovative solutions technologies such as augmented reality.

Systems and equipment: SHARP - HANTAREX - EXXTRON - BARCO - EIKI - CASIO - MISTRIP

Ten to One

EVENTS OVERVIEW

What else do you need?

Every idea contains within itself a tension that pushes it from the un-manifested to the manifested.

The space between these two moments is our work.

Often fast, hectic, always complex.

Hard to imagine what we will find along the way but our task is always to arrive and this simplifies yours.

Genesis: Whether your need is technical, logistic or creative, tell us about it. We'll help you design the project's guidelines until the product matches your idea exactly. Entrust yourself to our experience, our designers will always be excellent technical allies for you.

Rough study: We go and walk around the event location or find the appropriate location. We decide where we'll work and with which structures. We identify the event, its feasibility and do a cost analysis.

Production: Now we send out the information to the purchasing and production sectors, we also contact local authorities in order to solve any legal or logistical problems. We coordinate all sectors and organize the construction site.

Executive production: We build the sets. We supply and manage the lighting, audio and video systems. Production manages and co-ordinates the technical and artistic sectors. We plan the welcome service, catering and transport.

Your idea has materialized, come and see

This is true for wherever you are in the world

we work with the best international companies, for this we are able to

carry out and optimize your ideas **even if you're in the** desert.....! !

Live Events

Every major event is the construction of an Idea

BOTW offers complete production, both technical and logistical, for

every kind of live event.

We are partners of and service the major Italian and foreign artists.

Theatre, Cinema and TV

We are suppliers and consultants for the most important theatre, television and film producers

We create sets, installations and scaffolding and rigging for the major networks' television programs.

Inside our headquarters, in addition to the warehouses that host scaffolding and the various sectors' technologies the following are present: a machine workshop (with equipment for metalwork and aluminium processing including TIG welding), a painting department, a carpentry shop (complete with all the necessary equipment for construction and stagecraft) upholstery department, spaces allocated for pre assembly and a furniture store of the best brands.

Autonomy offers the client the advantage of having a single contact point and being able to follow production during its execution.

Expo and Stands

If your company's work is changed into a precise form, if the sound and the colours identify you, if your stand is not just an exhibition but a symbol of your work, the customer can enter into your world sensorially, appreciate and get to know you, together you and your company grow from one fair to the other.

Our designers and production have the experience and know-how needed to talk to you, to create spaces that express identity and convey your imprint in an unmistakable way.

BOTW productive and executive autonomy is the guarantee that allows you to choose and know that from start to finish you have one unique and reliable contact person.

BOTW takes care of the design, the project, its realization and of setting up and maintaining expo areas and stands regarding its structure, scenography and technical needs.

It supplies and manages lighting, audio and video systems. Designs and creates display stands and elements for indoor and outdoor spaces.
