

Spring separators for manual assembly

Spring separation

Tekda offers three manual separators for quick spring separation.

Easy to operate

- Pour springs into the separator to get untangled springs
- Small size allows easy relocation

Tekda BIG separator

Controlled by adjustable speed and output.

Features

- Size: 300 x 400 x 400 mm
- High output of around 1500 parts/minute
- Spring range: Diameter: 5-25 mm, length: < 50 mm

Tekda MINI separator

Versatile separator for a broad range of springs.

Features

- Size: 220 x 150 x 260 mm
- High output of around 1500 parts/minute
- Spring range: Diameter: 2-12 mm, length: < 35 mm

Tekda MICRO separator

Smallest spring separator using compressed air.

Features

- Size: 140 x 140 x 140 mm
- High capacity for micro springs
- Delivers springs onto a collection tray with a push button
- Spring range: Diameter: < 2 mm, length: < 6.5 mm
