

SERREMAR Italia S.r.l.

**ROAD SWEEPER SERVICE
and DRAIN CLEANING**

EN

ROAD SWEEPER SERVICE AND DRAIN CLEANING

Our vehicles will meet any of your needs for mechanical sweeping, cleaning and washing of drainage pits. This service, also combined, allows for the maintenance of construction sites, parking lots, squares, internal roads, access ramps, and industrial warehouses.

The machines used are the best available on the market and are equipped with water sprayers (for dust suppression) and a system for loading the residue of the street cleaning through mechanical and/or suction action.

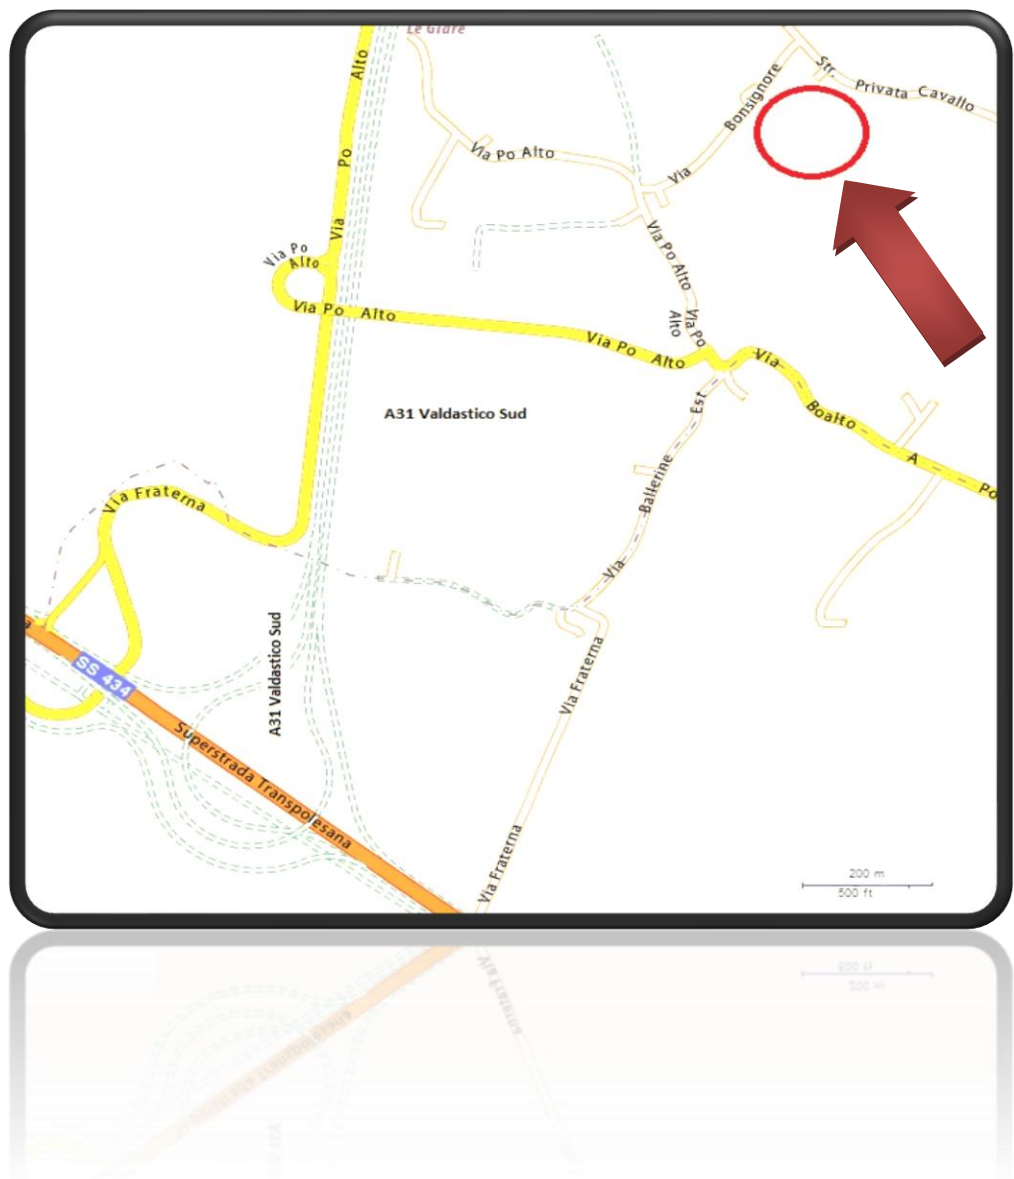

SERREMAR ITALIA will be able to provide a transport service for third parties and/or for its own account of the resulting materials, respecting the environment and any of your needs.
