VISION

METABUILDING is an Open Innovation platform enabling collaboration for the innovation actors of the European Built Environment Sector at regional, national and international scales. It facilitates joint innovation and contributes to the creation of integrated and enhanced business value chains. The platform will be extended and available in the official languages of all EU member states.

MISSION

The METABUILDING platform strives to enable seamless connexions between all stakeholders of the Built Environment sector. By putting in their hands dedicated and innovative tools, METABUILDING facilitates collaboration between companies and experienced innovation experts to help and speed up the transfer to the market of innovative sustainable products and solutions.

POSITIVE IMPACTS FOR A SUSTAINABLE BUILT ENVIRONMENT

The **METABUILDING** platform has been developed as a tool in the METABUILDING project, which has financed innovative collaboration projects among SMEs to enrich the Construction sector with knowledge and expertise coming from the following disciplines and sectors: **Additive Manufacturing, Nature-Based Solutions, Circularity & Recycling, and Digital Industry.**

The following impacts have been achieved:

More than 100 European SMEs have received direct financial and non-financial support.

Increased competitiveness and productivity of SMEs through international collaboration.

Stimulation of innovation potential of the Construction sector through cross-sectoral and cross-border collaboration.

Technical solutions for the built environment which help to reduce GHG emissions, energy consumption and waste.

**Innovating Together
for a Sustainable
Built Environment**

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No. 873964.

SERVICES FOR SMEs

Access to products, services and funding opportunities.

Gain visibility for products and solutions.

Access to innovation experts.

Find collaboration and business partners.

Locate new markets for innovative products.

SERVICES FOR CLUSTERS

Boost connection & collaboration with regional, national and European clusters, or other sectorial ecosystems / networks.

Profit of virtual working spaces to interact with members.

Improve the communication within and across clusters.

Find new members.

Link cluster to national and European platforms.

METABUILDING DIGITAL TOOLS

Products and Technologies

Explore and showcase innovative solutions for construction

Funding and Financing

Find and offer financial support opportunities

Collaboration Opportunities

Discover partners for innovation projects or business activities, and find distributors

Clusters and Innovation Ecosystem

Find an innovation cluster in your region / country

ACCESS TO ADVANCED INNOVATION SERVICES

Innovation and Testing Support

From the project phase until the testing in a real environment

Innovation Coaching

Get tailor-made support from ideation to commercialization

METABUILDING ECOSYSTEM

Directly linked to the ECTP (European Construction Technology Platform), the METABUILDING platform has become a valuable cross-border and cross-sectoral digital tool for SME innovation and collaboration in Europe, and the METABUILDING project has contributed to a closer collaboration between the EU level Industrial Platforms shown below.

The growing network of National Construction Technology Platforms, as first users of the METABUILDING platform, is a fundamental part of the European Innovation Ecosystem of the Built Environment Sector.
