Mission

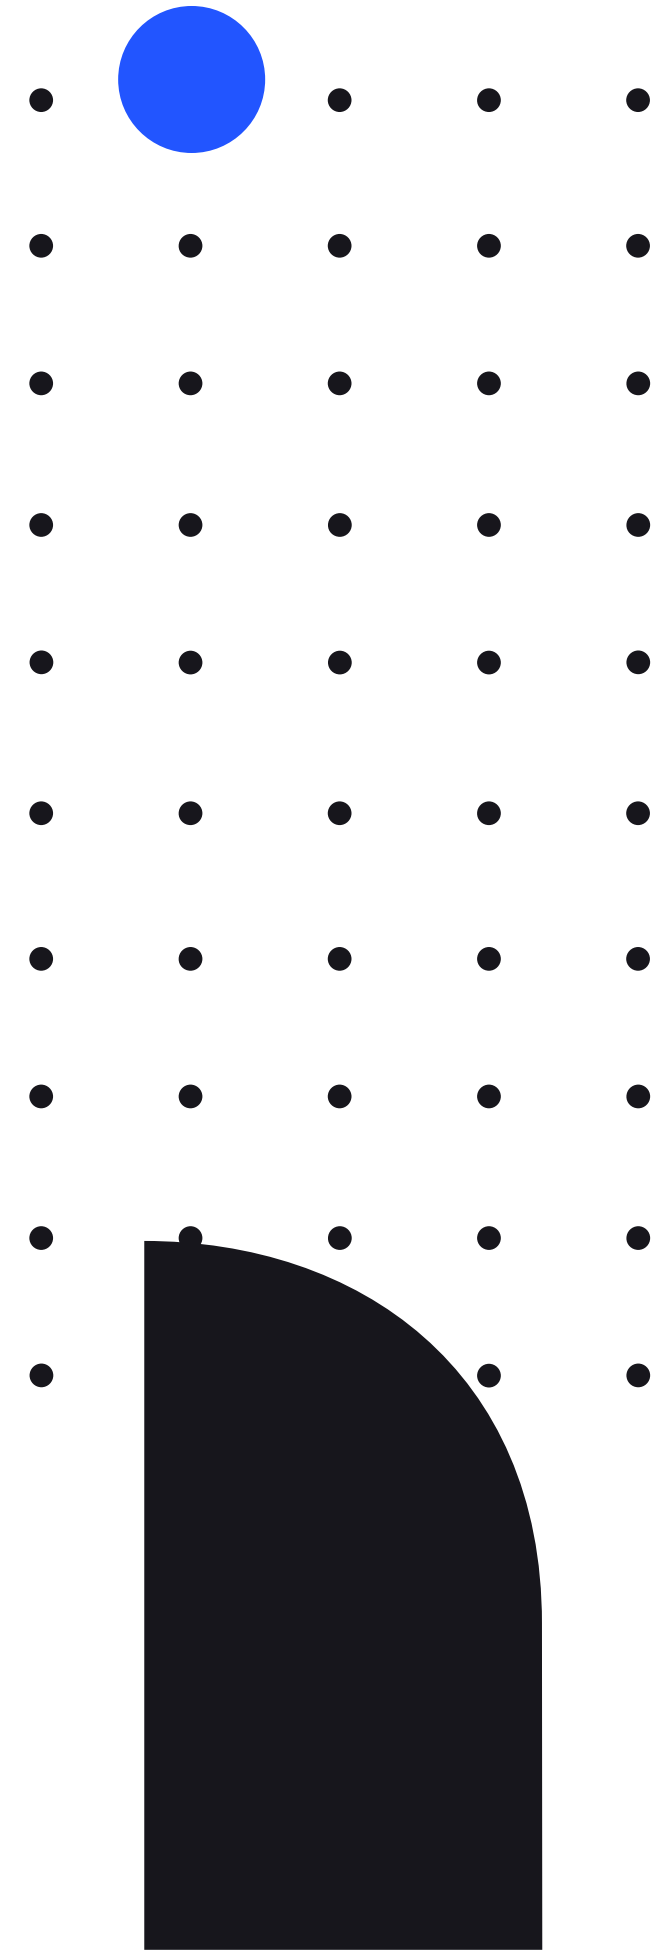

O.M.A. srl has been operating in the design, development and production of automotive components for over 25 years. The company specializes in the construction of molds, the development of prototypes, molding and assembly of sheet metal parts.

Its reference market is that of the main European car makers, and in particular it is aimed at the production of high-end models or special series.

It develops and manufactures products with a high technological content by exploiting the long experience on the market and the capacity for innovation that allows it to maintain a continuous and lasting relationship of collaboration with its customers.

Priority to the needs and expectations of the customer, proactivity and innovation are the trademarks of OMA.

Based on the extensive experience accumulated, the Mission is to offer itself as a supplier / partner of excellence able to satisfy every customer need in the field of sheet metal stamping, assembly, construction and design of molds.

1980

Start-up of activities in Turin (Italy) in the automotive sector and in particular in the segment of sheet metal stamping and mold construction.

1995

OMA implements its business by introducing the development of prototypes

2016

2018

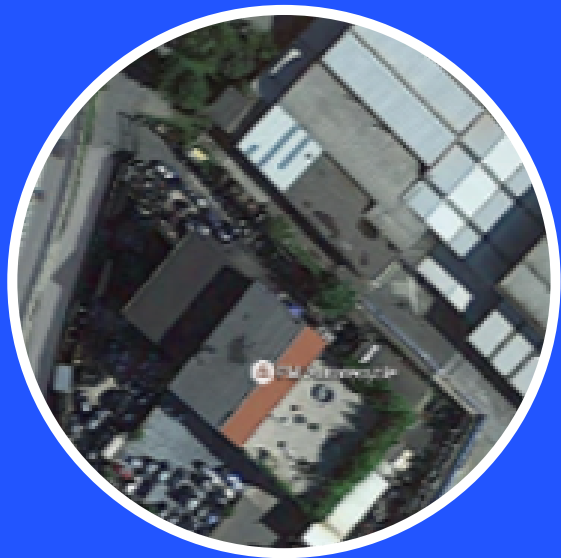

OMA buys the Cerizay plant (France) to develop its European expansion policy

How we are

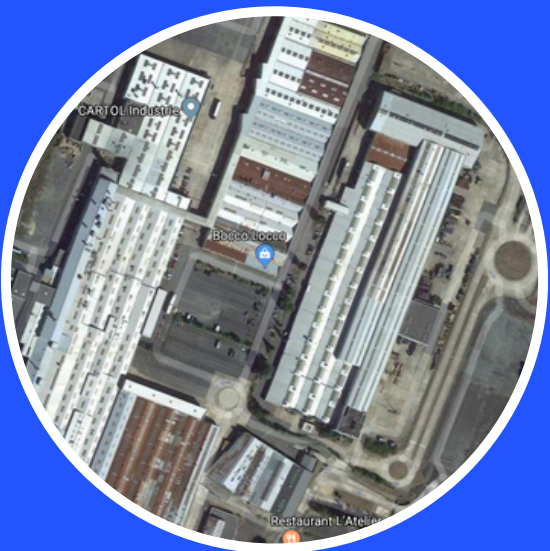

GRUGLIASCO, TORINO (ITALIA)
20.000 covered square meters
10.000 uncovered square meters

DRUENTO, TORINO (ITALIA)
11.500 covered square meters
3.500 uncovered square meters

CERIZAY (FRANCIA)
24.000 covered square meters
14.500 uncovered square meters

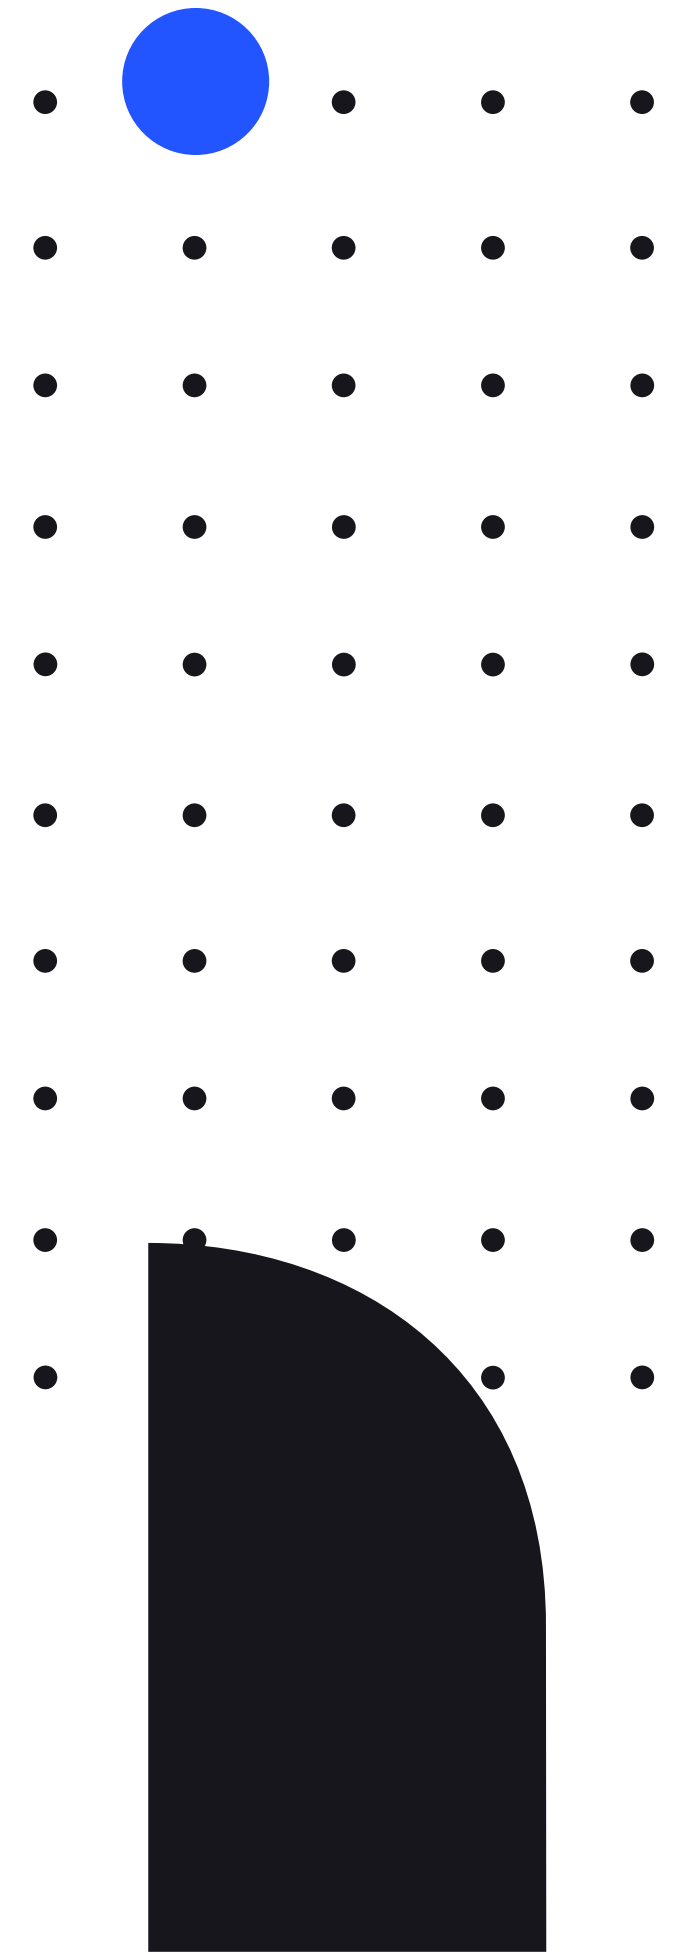

Where we are

VISION and VALUES

Corporate competitiveness is structured on the verticality of the production process, on investment planning and on the efficiency of direct production costs through design and automation. The quality of the final product is determined not only by the experience gained in over twenty-five years, but also by company choices that involve checks at every stage of processing. Throughout the entire production process, all appropriate measures are taken to safeguard safety and the environment.

At OMA we consider all employees and professional partners as central to our growth path. We operate internally with a genuine desire to cooperate and share new ideas among everyone. In daily activity, the commitment and determination of anyone lead to the achievement of the general objectives.
