

In occasione del 70° anniversario della costituzione della Attilio Cornali, aperta come ditta individuale da Attilio Cornali nel 1931 con pochi collaboratori, ma tanta buona volontà e tenacia del titolare, siamo ora arrivati alla 3a generazione dei Cornali ed ora la Società si presenta come :

ATTILIO CORNALI S.r.l.

Con una sede in Milano per l'ufficio vendite ed amministrazione ed una seconda sede in Pantigliate nelle vicinanze di Milano con lo stabilimento per la produzione di pezzi di ricambio per macchine da cucire comuni e speciali ed una linea stiro denominata "Spidivap".

La Cornali è da più di 45 anni l'Agente Generale per l'Italia della Casa Schmetz - la più importante fabbrica di aghi per il cucito del continente europeo.

Un particolare ringraziamento e riconoscimento va alla nostra clientela ed ai nostri collaboratori che ci seguono e ci incoraggiano da molti anni. Grazie anche ai loro suggerimenti tecnici abbiamo avuto modo di progredire ed allargare sempre più la gamma dei nostri prodotti.

Con la speranza di fare sempre meglio e di più, presentiamo ora

il nostro nuovo catalogo

pensando di fare cosa gradita.

Questo Catalogo annulla tutte le precedenti edizioni. Avendo apportato notevoli cambiamenti con aggiunte ed eliminazioni di articoli, l'ordine numerico è così venuto spesso volte cambiato. Preghiamo i Sigg. Clienti, nelle loro richieste, di voler sempre indicare oltre il numero e la descrizione dell'articolo, anche la relativa pagina di Catalogo.

CONDIZIONI DI VENDITA

- L'imballo, il trasporto e le eventuali spese di tratta sono fatturati al costo.
- La Ditta non è responsabile in caso di ritardata consegna, di perdita della merce, e si riserva di annullare gli ordini senza indicarne i motivi e senza obbligo di rifusione di danni.
- Non si accettano reclami trascorsi otto giorni dal ricevimento della merce.
- La merce viaggia a rischio e pericolo del committente.
- Non si accettano resi se non autorizzati e franchi di porto.
- In caso di contestazione è competente il Foro di Milano anche se il pagamento è pattuito contro tratta o presso la sede del compratore.
- Non si rilasciano quietanze se non accompagnate dalle relative fatture.
- Le eventuali diverse condizioni espresse dal cliente sugli ordini non saranno riconosciute valide se non da noi accettate.
- I prezzi sono oggetti a variazione senza obbligo di preavviso.
- I ns. prezzi si intendono per merce resa franco ns. magazzino.

TAMPONI PER INCHIOSTRATORI

L'inchiostro è solo nel colore nero.

Disponiamo di un tampone con inchiostro speciale per paesi molto caldi.

RETROSTAMPE CON RELATIVI TIPI DI COLLANTI

SPECIFICHE RELATIVE AI DIVERSI TIPI DI COLLA PER LE ETICHETTE AUTOADESIVE

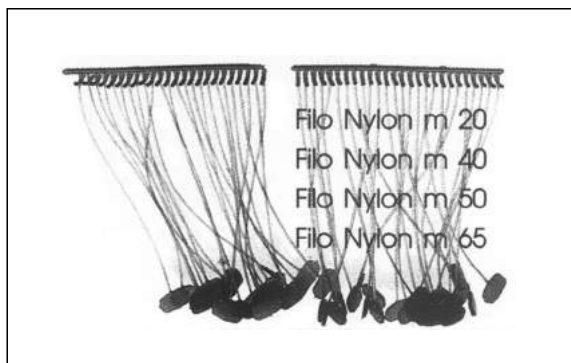

- 1) La retrostampa OPENTEX 1 indica che il collante utilizzato è del tipo leggero e viene denominato: removibile. Questa caratteristica rende estremamente facile la rimozione dell'etichetta senza lasciare residui di colla sul tessuto. Questo tipo di collante è conforme alle normative FDA (Usa) e BGA (Germania).
Temperatura di esercizio compresa tra: $0^{\circ} \div +80^{\circ} C$
- 3) La retrostampa OPENTEX 3 indica che il collante utilizzato è del tipo medio denominato: permanente. Garantisce un'ottima coesione e può essere utilizzato in quasi tutte le applicazioni nel settore della confezione. Questo tipo di collante è conforme alle normative FDA (Usa) e BGA (Germania).
Temperatura di esercizio compresa tra: $0^{\circ} \div +100^{\circ} C$
- 4) La retrostampa OPENTEX 4 indica che il collante utilizzato è del tipo forte denominato appunto: forte. Il forte potere di coesione rende difficile la rimozione dell'etichetta e deve essere impiegato ove non sia possibile l'utilizzo degli altri tipi (A, B, D). Da ciò si evince che è consigliabile per tessuti come jeans, cotone e tessuti pesanti in genere.
Temperatura di esercizio compresa tra: $0^{\circ} \div +100^{\circ} C$
- 15) La retrostampa OPENTEX 15 indica che il collante utilizzato pur avendo un notevole potere di coesione non lascia alcun residuo sui tessuti e per questo è denominato: antimacchia. Detto collante mantiene inalterate le sue caratteristiche anche se sottoposto a temperature elevate, quindi particolarmente indicato nella stiratura a caldo. Ne è consigliato l'uso su tessuti molto delicati come la seta, il lino e gli altri similari.
Temperatura di esercizio compresa tra: $-10^{\circ} \div +120^{\circ} C$

SCHEDA TECNICA CB 1000

Novità

- Lampadina alogena 12 volt. 5 wat.
- Interruttore sulla 220 volt. microfuso.
- Cavo della 12 volt. cm. 180.
- Porta lampada teflonato.
- **Trasformatore ingresso 220 volt. uscita 11,6 volt. stabilizzata, in questo modo si evita che la lampadina si bruci, nei casi di sbalzi di corrente.**

«KRIKO»

PORTA ROCCHETTINI

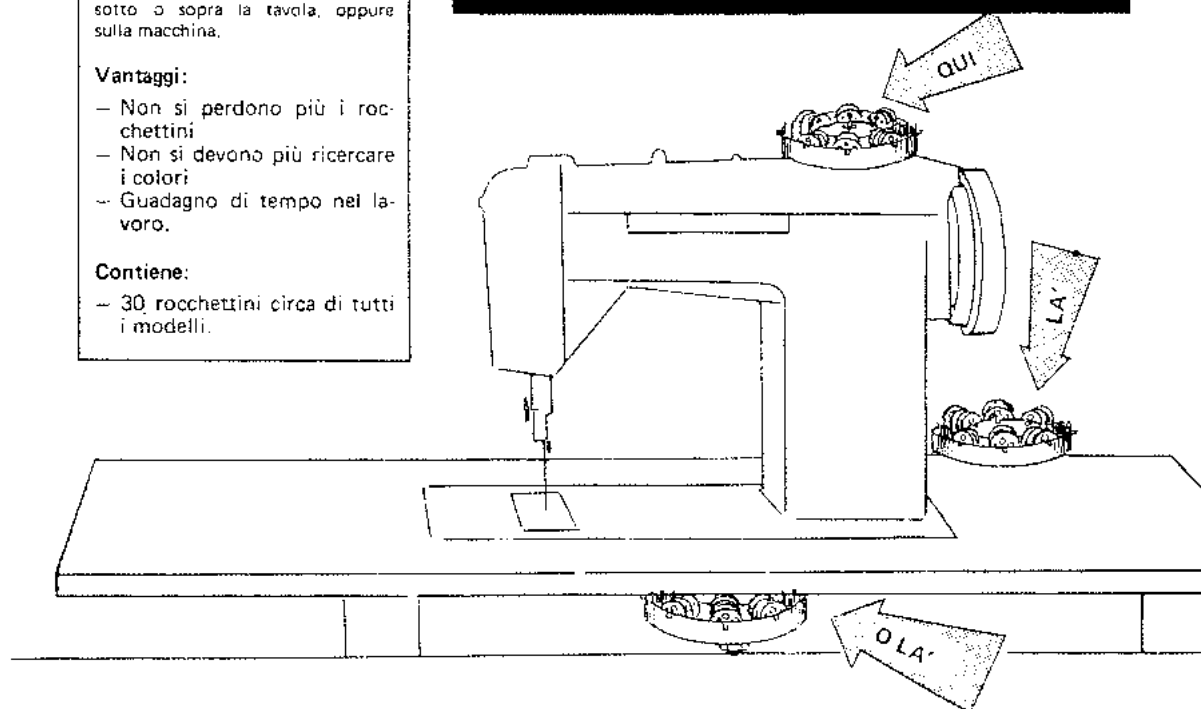

Il porta-rocchettini KRIKO, che può essere installato su tutte le macchine per cucire industriali, si fissa con una semplice vite da legno sotto o sopra la tavola, oppure sulla macchina.

Vantaggi:

- Non si perdono più i rocchettini
- Non si devono più ricercare i colori
- Guadagno di tempo nel lavoro.

Contiene:

- 30 rocchettini circa di tutti i modelli.

PER ASOLE

MOLTO IMPORTANTE

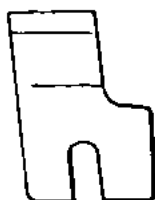

Questo Catalogo annulla tutte le precedenti edizioni.
Avendo apportato notevoli cambiamenti con aggiunte ed eliminazione di articoli, l'ordine numerico è così venuto spesso volte cambiato.
Preghiamo i Sigg. Clienti, nelle loro richieste, di voler sempre indicare oltre il numero e la descrizione dell'articolo, anche la relativa pagina di Catalogo.

MOLTO IMPORTANTE

Questo Catalogo annulla tutte le precedenti edizioni. Avendo apportato notevoli cambiamenti con aggiunte ed eliminazione di articoli, l'ordine numerico è così venuto spesso volte cambiato.

Preghiamo i Sigg. Clienti, nelle loro richieste, di voler sempre indicare oltre il numero e la descrizione dell'articolo, anche la relativa pagina di Catalogo.

CON MOTORE INCORPORATO

NUOVO MODELLO

Accessori in dotazione

- Mola a tazza bianca Ø 125 x 35 x 12
- Mola piana Ø 125 x 10 x 12
- Pietra ravnivamole
- Chiave fissa esagonale mm. 10
- Chiave a tubo 17 x 19
- Supporto per applicazione mole supplementare

Dati tecnici

- Motore monofase 220 V. - 0,5 HP - 50 Hz
2800 giri/min. oppure:
- Motore trifase 220/380 - 0,5 HP - 50 Hz
- Diametro della mola 125 mm
- Velocità periferica della mola: 18,5 m./sec.
- Dimensioni: altezza cm. 21
lunghezza cm. 50
larghezza cm. 20
- peso: netto kg. 20 - lordo kg. 21

Portacoltello per tagliacuci

Supporto per affilatura delle forbici

Portacoltello per asolatrici

Portacoltello per Pfaff 471

L'affilatrice "CORNALI Mod. 125" è in grado di affilare qualsiasi tipo di coltelli per macchine tagliacuci, per asole, ecc.; inoltre, applicando un supporto, offre un piano inclinabile per affilare le forbici.

Siamo altresì in grado di fornire un portacoltello speciale con angolatura fissa, in modo che il coltello venga semplicemente inserito nella scanalatura e fissato, il che elimina qualsiasi errore di affilatura. Onde evitare equivoci, in caso di ordine, specificare la classe della macchina ed il numero originale del coltello. Qui di seguito Vi segnaliamo alcuni dei portacoltelli più comuni, abitualmente disponibili in stock;
