

MV 301

Manual diaphragm valve

MV301 manual diaphragm valve is the new product with multifunctional adjustment module of ergonomics and with limit and lock functions as well. Superior flow channel and Diaphragm connection of the suspension structure, Make the performance of the product more superior.

Easy installation and maintenance

- * Easy to install with more snaps and threaded structures
- * All-plastic appearance is beautiful and corrosion resistant
- * Accurate screw fit clearance, smooth operation and maintenance-free
- * Same sizes and installation length as international brands products
- * Integrated visual position feedback and easy to observe
- * The adjustment module is Ergonomic
- * The handwheel has locking function every 22.5° precise adjustment and opening / closing management

High safety performance

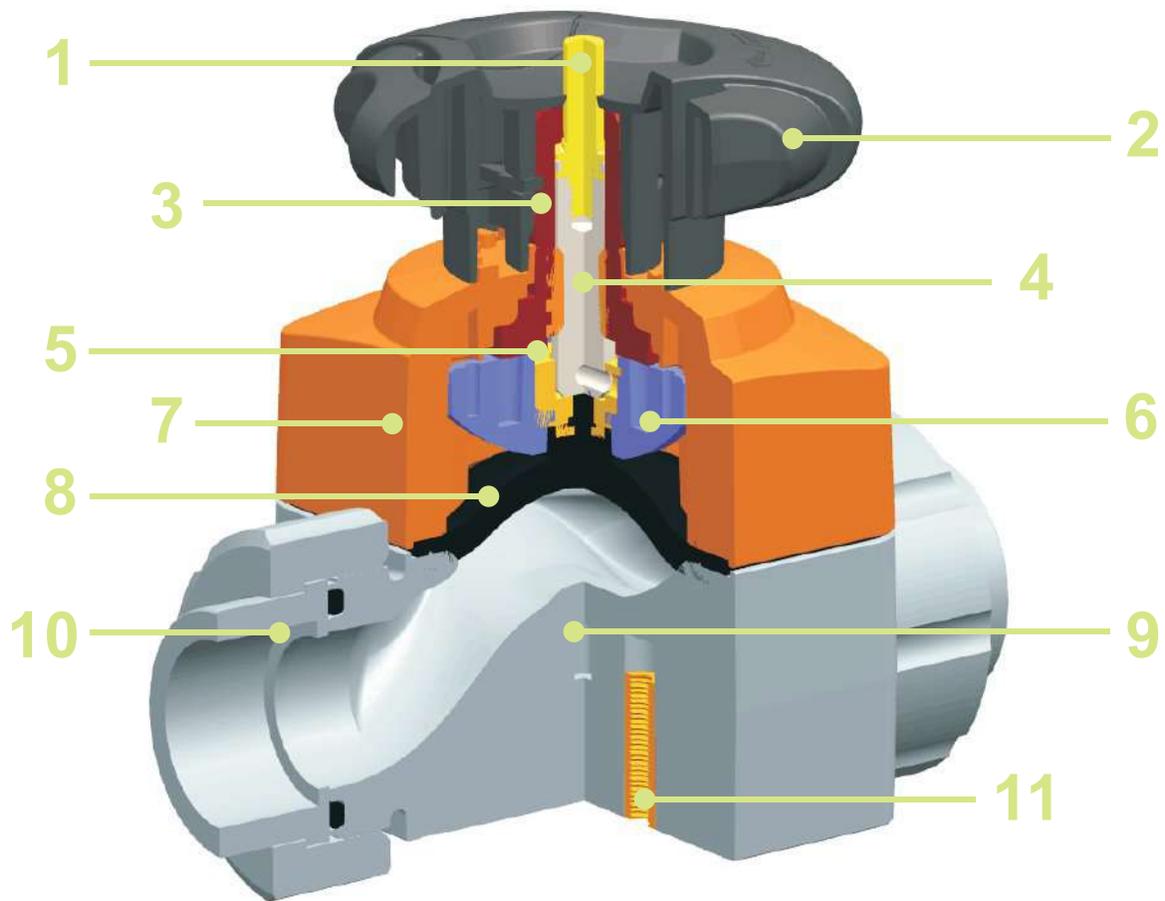

- * Diaphragm compressor designs with limited position and torque overload protection
- * Diaphragm connection of the suspension structure to fully protect the diaphragm
- * The hand wheel adjusting module is provided with an integral locking switch, which can be padlocked

High Flexibility

- * True union connection, loose flange connection, butt-fusion connection without unions
- * DIN, JIS and ANSI standards are available
- * Diaphragms are available for EPDM, FPM and EPDM-PTFE
- * Bodies are available for PVC-U, PVC-C, PP-H and PVDF
- * Oil free valves are available for PP-H and PVDF valves

The best flow performance

- * Superior flow channel makes the linear characteristics of the fluid more precise and controllable
- * The smooth and excessive curved channel has smaller pressure loss, and brings double flow capacity compared with the traditional diaphragm valve
- * Suitable for liquids with small amounts of particles and solids

1 Indicator:
Bright and easy to see

2 Handwheel:
Adjustable limit
Including padlock function
module

3 Lead screw nut:
High strength
Friction resistant

4 Screw rod:
304F stainless steel
High Precision
Smooth operation

5 Coupling:
Screw rod connecting contactless
Independent suspension

6 Diaphragm compressor:
High strength, Not easy to deform
High temperature resistance

7 Seat cover:
Closed design
Suitable for rubber expansion

8 Diaphragm:
Embedded fiber vulcanization
Molded open state

9 Seat:
Duckbill runner has large
flow
Smooth curved path

10 Connection:
Different ways
Consistent with
international standards

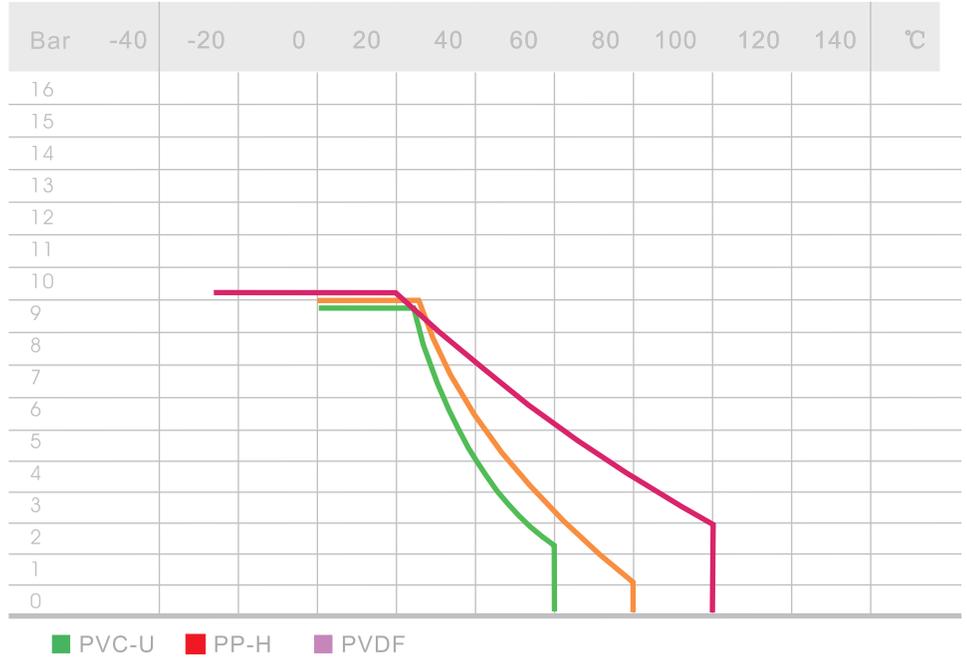

11 Base:
Mounting nut included

+ Technical characteristics

Pressure temperature curve

All data based on water for consider -ring 25 years safe life time

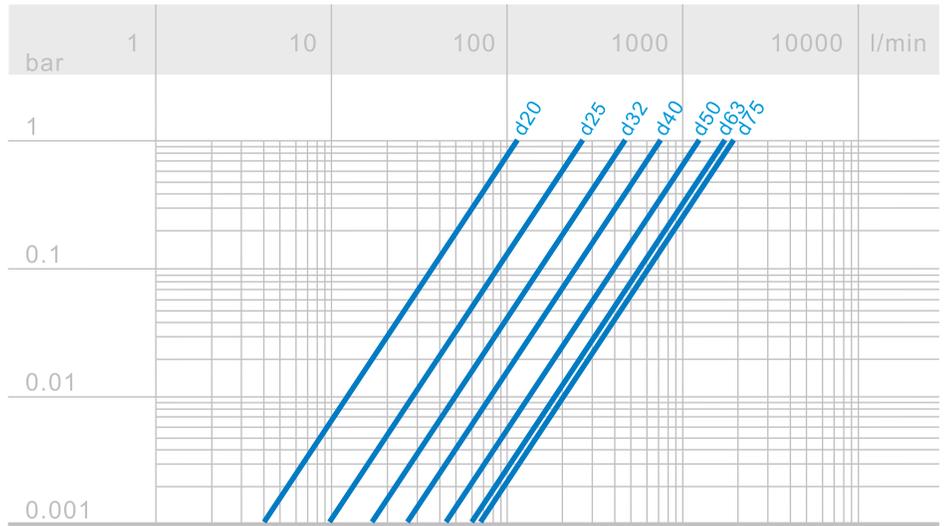

Other liquids request to reduce the temperature and pressure accordingly

Flow capacity

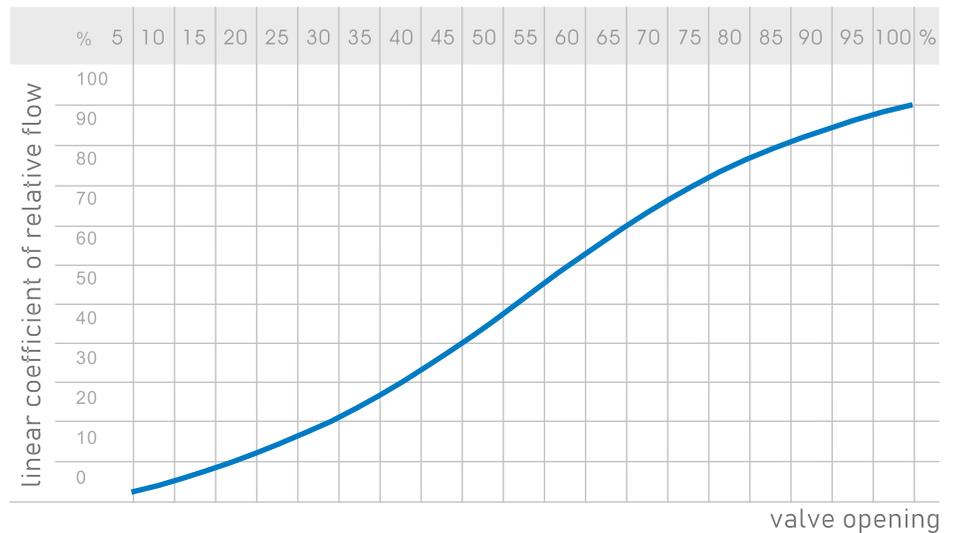

All data are for 20°C water with 1 bar pressure difference

- $C_v = k_v \times 0,07$
- $F_v = k_v \times 0,0585$
- Kv (l/min)
- Cv (gal/min) US
- Fv (gal/min) GB

Line chart for relative flow rate

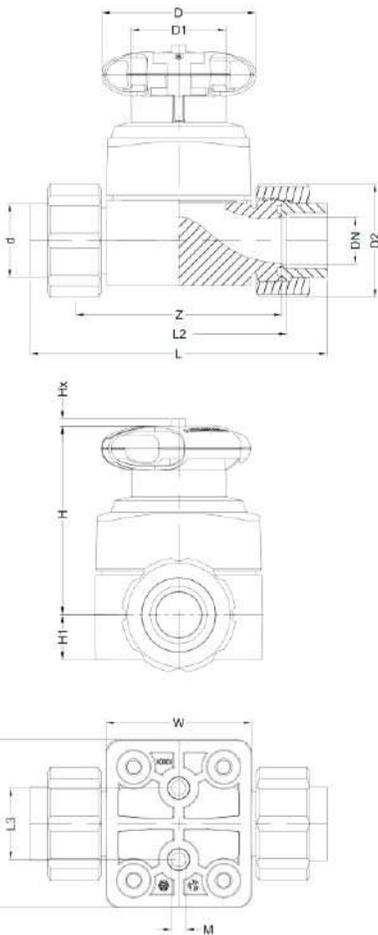

The linear coefficient of relative flow refers to the flow change as a function of valve opening stroke
