

Pneumatic diaphragm valve MV303

Standard Chemical-type

MV303 is a type of standard chemical grade pneumatic diaphragm valve, which has the new design of smooth runner for superior performance for big flow and the overall mechanical mechanism is more optimized. This type of valves has high performance applications for water and chemical with PN10 pressure rate.

Easy installation and maintenance

- * The design with a protective cover for position feedback is suitable for outdoor and harsh environments
- * Integrated visual position feedback and easy to observe
- * Built-in mounting base of pilot-operated solenoid valve for quick installation
- * All-plastic appearance is beautiful and corrosion resistant
- * Same sizes and installation length as international brands products
- * Super lubricating property, maintenance-free
- * The direction of air inlet is optional every 90° which is convenient for installation in tight space

High safety performance

- * Air nozzle thread embedded design is suitable for various installation strengths
- * Over pressure margin design of valve body and pneumatic actuator to ensure safety application
- * Smooth curved channel has better overpressure protection for water hammer

High Flexibility

- * True union connection, loose flange connection, butt-fusion connection without unions
- * DIN, JIS and ANSI standards are available
- * Diaphragms are available for EPDM, FPM and EPDM-PTFE
- * Bodies are available for PVC-U, PVC-C, PP-H and PVDF

The best flow performance

- * Superior flow channel makes the linear characteristics of the fluid more precise and controllable
- * The smooth and excessive curved channel has smaller pressure loss, and brings double flow capacity compared with the traditional diaphragm valve
- * Suitable for liquids with small amounts of particles and solids

1 Transparent protective cap is suitable for outdoor and harsh environment applications

2 Bright-colored position indicator for easy viewing

3 Independent pneumatic actuator and compact design is suitable for corrosive applications

4 Anti-riot compressed air is connected with G1/4 thread

5 Pilot solenoid valve mounting base

6 The actuator is equipped with 4-6 independent springs anti-corrosion treated which make the piston load more uniform

7 High-strength glass fiber plastic piston, combined with stainless steel support plate to ensure no deformation

8 High strength stainless steel stem with unique material characters

9 The coupling mechanism is independent suspension, the valve rod has no load on the diaphragm, and the structure is superior

10 Molded diaphragms with embedded vulcanized fiber layer reinforcement have a longer service life

11 The unique inner cavity of the valve seat cover ensures the perfect compression of the diaphragm without lateral expansion

12 The smooth curve improves the linear curve and ensures the precise adjustment in the whole opening and closing stroke

13 Duckbill runners increase flow coefficient and reduce pressure loss. Flow efficiency significantly improved

14 The base has standard mounting bolts for independent fixing and support

+ Technical characteristics

Pressure temperature curve

All data based on water for consider -ring 25 years safe life time

Other liquids request to reduce the temperature and pressure accordingly

Flow capacity

All data are for 20°C water with 1 bar pressure difference

- $C_v = k_v \times 0,07$
- $F_v = k_v \times 0,0585$
- K_v (l/min)
- C_v (gal/min) US
- F_v (gal/min) GB

Line chart for relative flow rate

The linear coefficient of relative flow refers to the flow change as a function of valve opening stroke

Operating pressure control pressure

The maximum control pressure requested for EPDM, FPM and epdm-PTFE diaphragm

The actual drive data for different dimensions please refer to the operation manual

Actuator functional characteristics

Control function	DA	SR	
	DA	NC	NO
valves open	Air	Air	Spring
valve closed	Air	Spring	Air

Gas consumption for actuators

Under the required drive pressure, the compressed air required to fully open or close the valves

		Dm ³						
d		20	25	32	40	50	63	75
NC		0,12	0,12	0,24	0,24	0,44	0,44	0,44
NO		0,20	0,20	0,44	0,44	0,88	0,88	0,88
DA	Open	0,12	0,12	0,24	0,24	0,44	0,44	0,44
	Closed	0,20	0,20	0,44	0,44	0,88	0,88	0,88

Connection of the drive air supply

Air source interface size: A air inlet G1/4 threaded

B air inlet G1/4 threaded

NC: control pressure connects air inlet B, valves open

NO: control pressure connects air inlet A, valves close

DA: control pressure connects air inlet A, valves close; control pressure connects air inlet B, valves open

NC/NO pilot-operated valve: with 3/2 solenoid valve

DA pilot-operated valve: with 5/2 solenoid valve

Note:

The driving pressure of all actuators cannot be higher than the upper limit to ensure safe use and achieve optimal functions. If the control pressure exceeds the limits, a malfunction may occur. In this case, a new actuator configuration is required.

Intelligent electrical locator MA600

- * Control accuracy of valve position 0.5%
- * It has good static and dynamic tracking characteristics
- * Powerful software self-learning function, for the movement characteristics of the valve, develop the best control algorithm
- * Easy to install snap and threaded structures
- * Plastic base, Stainless steel case, Environmental corrosion resistance, flame retardant, anti - UV aging

Power Voltage	24V/DC $\pm$ 10%, power ripple < 200mV
Power consumption	SR $\leq$ 2W, DA $\leq$ 4W
Electrical connections	M12 Waterproof Conn
The input signal	4-20mA, 0-5V, 0-10V, 0-20mA
The input impedance	Current series $\leq$ 180 Ω , Voltage series $\leq$ 20K Ω
Accuracy of the input	$\pm$ 1%
Output type	4-20mA
A digital signal	2-wire binary output
Protection grade	IP 66
Shell material	PA66+SUS304
Environment temperature	-10 $^{\circ}$ C $\sim$ +50 $^{\circ}$ C
Control medium	Air, DIN ISO 8573-1, Granularity Class 5
Control pressure	0.5-0.6 Mpa

Size

Appearance

Limit switch MA610

- * Easy to install snap and threaded structures
- * Two-color LED working indicator light
- * Imported micro switch, high reliability
- * Suitable for DN15-100 caliber

Power voltage	24V/DC $\pm$ 10%, Single loop current Max50mA
Power consumption	$\leq$ 0.05W
Electrical connections	M12 Waterproof Conn
The input signal	Switch quantity DC24V or Passive contact
Protection grade	IP 66
Shell material	PA66+PC
Environment temperature	-20°C ~ +80°C

Size

Appearance

Compact limit switch MA611

- * Easy to install snap and threaded structures
- * Two-color LED working indicator light
- * Imported micro switch, high reliability
- * Suitable for DN15-50 caliber
- * Can not be used in high magnetic environment

Power voltage	24V/DC $\pm$ 10%, Single loop current Max50mA
Power consumption	$\leq$ 0.05W
Electrical connections	M12 Waterproof Conn
The input signal	Switch quantity DC24V or Passive contact
Protection grade	IP 65
Shell material	PA66+PC
Environment temperature	-20°C ~ +70°C
