Italian Wooden Finishes

Finbi Vernici Italia is strongly connected between professional skills and attention to people's need, which are the two main characteristics of a team whose sole aim, from the General Manager to the ordinary worker, is to keep the customer satisfied.

The range of products specifically developed to meet every type of request on the market includes:

- PU based sealers and top coats
- Polyester based sealers and top coats
- Picture frames painting products, for modern, classical, new effects cycles
- Water and solvent based products for outdoor applications (impregnating agents, sealers, top coats, tixotropic types); with long-lasting durability to climate variations and excellent wood protection against biochemical and physical agents
- Solvent (no harmful types) and water based stains for any kind of application (roller, spray, dipping, brush etc.); available in transparent, semi-transparent and semi-biding types
- Fast drying oily patinas, solvent or water based
- Epoxy resin extra transparent for flooring
- Synthetic or epoxy based coatings for industrial applications, oven or natural drying
- Special products for flooring, in mono/two components or UV version; high abrasion and hits fastness
- Water based sealers and top coats, one or two packs, with appearance and properties similar to PU's
- Liquid pure silver and gold application
- Nitro based sealers and top coats
