

the PROMPT RUNWAY

1

how to write effective prompts
for generate design sketches with annotations

how to start

to generate drawings with design sketch effect, you can start:

- 1| from a photo of an existing garment which you want to use as a base
- 2| from a collage of multiple pieces
- 3| from a text description (prompt)

**where
it works?**

SO:

*you may choose to upload
one or more reference images.*

*in any case, copy the text
you will find in next page
into the prompt box:*

write this prompt:

“A highly detailed industrial conceptual sketch of a (type of object or structure), drawn on (warm white, cool white, fine textured, etc.) drafting paper.

The subject is depicted in an accurate perspective view, with clear structural lines and complex geometric details. Fine black ink lines define form and texture, while red and blue construction guidelines mark axes and measurements.

Annotations such as dimensions, material indications, or construction details are handwritten in small script across the page, with arrows and numbered callouts highlighting key design elements.

Additional perspective studies or orthographic projections (such as front views, top views, sections, or detail views) appear around the main drawing, connected by thin (red, blue, etc.) reference lines.

The style is both artistic and technical: expressive hand-drawn linework with pen pressure variation, light graphite shading, delicate gradients, and visible paper grain.

The composition resembles the conceptual sheet of a professional designer, balancing creativity with engineering precision.

Style: hand-drawn technical conceptual sketch, industrial and architectural design illustration, perspective and orthographic layout, (red and blue) pen detailing, realistic drafting paper texture, photographed with neutral lighting, 8K scan quality. Image ratio 3:2.”

if the lines appear too faint, add to the prompt: “stronger drawing lines, sketch details more clearly visible.”

The Devil Wears Prompt

* remember to
personalize the prompt
and to upload
your reference images

*Tip: if you want
copy > paste the
prompt, send me
an email, I will
send you the text*

LAST TIP:

In every AI app you can also upload images
In addition to suggestions.
Be sure to avoid infringing the copyrights
of the images you use, unless you use them
as a starting point for very personal processing.
