

WORLD SOCIETY OF PERSON-CENTERED MEDICINE (WSPCM)

Honorary Permanent Fellowship of the co-founder prof. Vito Galante

Professor Galante MD MA since many years is serving a senior faculty member and academic leader , honorary chair in Adolescentology at:

- **Università Ambrosiana, Milano**
- **Scuola Medica di Milano (Medical School of Milan)**

In these institutions—recognized as the birthplace of the modern paradigm of Person-Centered Medicine—he has played a central role in:

- medical education and curriculum development,
- clinical training grounded in PCM principles,
- institutional promotion of person-centered clinical practice,
- mentoring of medical students and young physicians in the epistemology and ethics of PCM.

Prof. Vito Galante is the Vice-President of the Italian Society of Person-Centered Medicine

His work has contributed to strengthening the scientific identity and international recognition of the Milan School of Medicine as a leading center for person-centered clinical science.

Scientific and Educational Contributions

Professor Galante has been deeply involved in:

- **clinical teaching** based on the centrality of the person,
- **integration of biomedical, psychological, and relational dimensions** in medical curricula,
- **promotion of PCM as a scientific paradigm,**
- **development of educational programs** aligned with the standards of the World Health Charter and the WSPCM,
- **support of institutional initiatives** for the advancement of person-centered clinical practice.

His contributions have helped consolidate the epistemological foundations of PCM within Italian medical education, ensuring that future physicians are trained to recognize the person as the primary agent of health and care.

Alignment with the Principles of Person-Centered Medicine

Professor Galante's work exemplifies the core values of the WSPCM:

1. Centrality of the Person

His teaching and clinical approach consistently affirm the dignity, autonomy, and uniqueness of each patient.

2. Scientific Rigor and Humanistic Vision

He has contributed to the integration of biomedical science with the human sciences, reinforcing the holistic epistemology of PCM.

3. Educational Leadership

His role in the Università Ambrosiana and the Scuola Medica di Milano has been instrumental in shaping generations of physicians trained in person-centered clinical reasoning.

4. Institutional Commitment

He has actively supported the development of PCM as an institutional paradigm, contributing to the international recognition of Italy as the birthplace of Person-Centered Medicine.

Prof. Galante has been elected Vice-president and President of the European delegation of WSPCM.
